

Take control of your security outcomes

Turn security complexity into clarity, action, and measurable improvement.

Most organizations lack the resources, visibility, and structure to effectively manage cyber risk. Sophos CISO Advantage gives you a clear, repeatable model to understand risk, prioritize action, meet compliance requirements, and demonstrate progress. AI accelerates assessment, analysis, and reporting. Organizations gain the insight and control needed to confidently manage security outcomes.

1 in 10,000

organizations have a dedicated CISO, leaving a critical gap in security leadership.¹

90%

of organizations are concerned they are not compliant with regulatory requirements.²

39%

of IT and security team time is spent on compliance activities.³

WHAT SOPHOS CISO ADVANTAGE DELIVERS

A structured approach to improving security outcomes.

Establish a clear understanding of cyber risk.

Few organizations have clear visibility into how their security controls perform in practice. Sophos CISO Advantage provides a structured assessment of your environment, helping you identify defense gaps based on your individual threat profile and unique business context.

- Baseline assessment tailored to your environment.
- Continuous evaluation of control effectiveness.
- Outcome-focused delivery with ongoing assessment, prioritization, and progress tracking.

Connect decisions to business impact.

Security data is often complex and difficult for business leaders to interpret. Sophos CISO Advantage translates technical insight into clear, actionable intelligence that supports informed decision-making.

- Board-ready reporting aligned to business risk.
- Clear prioritization of security investments based on risk.
- Improved communication between IT and leadership teams.

Turn insight into action.

Understanding risk is only the first step. Sophos CISO Advantage provides a defined path from assessment to improvement, helping you take structured action to reduce exposure.

- Action plans based on identified defense gaps.
- Alignment to industry frameworks such as NIST and CIS.
- Drives continuous improvement across your security posture.

Track progress. Drive confidence.

Security is not a one-time activity. Sophos CISO Advantage provides continuous visibility into performance, enabling you to demonstrate measurable improvement over time.

- Ongoing monitoring of security posture.
- Progress reporting against compliance frameworks.
- Evidence of risk reduction for leadership, regulators, and insurers.

AT A GLANCE

- Provides a structured, repeatable approach to understanding and managing cyber risk.
- Scales CISO-level guidance to every organization, with or without a CISO.
- Delivers continuous control validation, compliance mapping, peer benchmarking, and executive-ready risk assessment.
- AI accelerates assessment, analysis, and reporting.
- Provides clear prioritization of actions to reduce risk and improve outcomes.

WHO NEEDS IT

- Organizations without a dedicated CISO needing structured security leadership.
- Organizations with a CISO looking to scale security strategy, reporting, and decision-making.
- IT and security leaders that want to understand and measurably improve their cyber risk.
- Businesses managing multiple compliance requirements with limited resources.
- Organizations seeking clear visibility into risk, performance, and investment effectiveness.

BUSINESS BENEFITS DELIVERED

Reduce risk. Improve efficiency. Strengthen decision-making.

Reduce risk.

Gain a clear, accurate view of your security posture and address the defense gaps that matter most. Focus effort and investment on the actions that reduce exposure and improve resilience.

Improve efficiency.

Reduce the time and effort required to manage security and compliance. AI-driven workflows streamline assessment, reporting, and ongoing monitoring without adding complexity.

Strengthen decision-making.

Make informed, confident security decisions based on real data and measurable outcomes. Clearly communicate performance, justify investment, and align security with business priorities.
