

Texas Risk and Authorization Management Program Certification

The information below is provided as a companion to the TX-RAMP Certification.

Cloud Service Name

Sophos: Sophos Cloud

Cloud Service Provider URL

<https://www.sophos.com/en-us>

Cloud Service Description (200 words or less)

Sophos Cloud provides a suite of next-generation cybersecurity products for monitoring and protection from most advanced cyberthreats. Powered by SophosLabs – a global threat intelligence and data science team – Sophos' cloud-native and AI-enhanced solutions secure endpoints and networks against evolving cybercriminal techniques, including ransomware, malware, exploits, data exfiltration, automated and active-adversary breaches, phishing, and more. Sophos Central, a cloud-native management platform, integrates Sophos' entire portfolio of next generation products into a single synchronized security system accessible through a set of Application Programming Interfaces (APIs).

The services in scope of the Sophos Cloud product are: Sophos Central products (Endpoint, Server, Mobile, Encryption, Wireless, Email, Firewall, Phish Threat, ZTNA, Switches), SophosLabs Intelix, Sophos Optix, and Sophos Managed Detection and Response (MDR).

Certification Status

Level 2
