

Smarter mobile management. Stronger mobile protection.

Secure users anywhere.

Mobile device management and mobile threat defense, working as one. Simplify administration, protect business data, and help keep users working across corporate-owned and personal devices.

54%

of organizations experienced a data breach linked to an employee mobile device.¹

PONEMON INSTITUTE

27%

of smartphone users experienced phishing: 26% experienced mobile malware.²

OMDIA

52%

of users now have three or more devices.³

IDC

WHAT SOPHOS MOBILE DELIVERS

Control devices. Protect users. Secure data.

Take control of every mobile device.

Simplify mobile operations with one intuitive experience for managing devices, apps, content, policies, and compliance across your mobile estate.

- Manage corporate-owned and personal devices
- Accelerate enrollment and policy deployment
- Automate action when devices fall out of compliance

Stop mobile threats before they spread.

Move beyond basic device configuration with mobile threat defense that helps protect users, business data, and productivity wherever work happens.

- Block phishing and risky websites
- Detect malicious or unwanted apps
- Identify risky network connections

Protect business data. Respect user privacy.

Keep business apps and information in approved workflows while giving users the privacy they expect on personal devices.

- Deploy and configure business apps and content
- Apply controls tailored to corporate-owned and personal devices
- Keep business data separate from personal information

Unify mobile and endpoint security.

Bring mobile management and security into the wider Sophos Fusion cyber defense system to reduce tool switching and strengthen control across devices.

- Manage mobile devices alongside Sophos-protected endpoints
- Detect and respond to mobile threats with Sophos XDR and Sophos MDR

SOPHOS MOBILE AT A GLANCE

- Mobile device management (MDM) and mobile threat defense (MTD) in one intuitive experience
- Streamlined management for corporate-owned and personal devices
- App, content, compliance, and business-data controls
- Protection against phishing, malicious apps, risky sites, and unsafe networks

WHO IT'S FOR

- IT teams managing diverse mobile estates
- Organizations supporting corporate-owned and BYOD programs
- Teams that need control of business data on mobile devices while respecting personal privacy
- Organizations extending security across mobile and endpoint devices

THE SOPHOS MOBILE ADVANTAGE

Take the complexity out of mobile security.

Flexible by design.

Support corporate-owned and bring-your-own-device (BYOD) programs with controls suited to each ownership model.

Protection beyond configuration.

Defend mobile users from phishing, malicious or unwanted apps, unsafe websites, and risky networks.

Better together.

Manage mobile and endpoint security through Sophos Fusion to reduce tool switching and improve visibility.

INDUSTRY RECOGNITION
