Top five reasons to use MDR services

Managed detection and response (MDR) is a fully managed, 24/7 service delivered by experts who specialize in detecting and responding to cyberattacks that technology solutions alone cannot prevent.

Whether you want the MDR service to completely manage your threat response, co-manage it with your team, or alert you so you can take action, MDR offers many advantages.

1. Elevate Your Cyber Defenses

24/7 threat detection, investigation, and response delivered by experts enhances your protection against ransomware and advanced cyberattacks.

"With Sophos MDR, we have reduced our threat response time dramatically."
Tata BlueScope Steel

2. Free Up IT Capacity

With MDR experts taking care of cyber threats, IT teams can concentrate on delivering strategic initiatives and supporting the business.

"Sophos keeps on top of the latest activity and threats so we can focus on delivering a secure, world-class service for customers and artists."
CD Baby

3. Get 24/7 Peace of Mind

IT teams, senior leaders, and customers enjoy the reassurance that the organization and data are protected by experts around the clock.

"Having the Sophos MDR team behind me helps me sleep at night because I know that we are being protected 24/7."
Vancouver Canucks

4. Add Expertise, Not Headcount

MDR services provide the expertise, so you can expand your security operations capabilities without expanding your team.

"Sophos MDR helped us keep up with the growing volume and sophistication of cyber threats without ramping up our security operations team."
Tourism Finance Corporation of India

5. Improve your Cybersecurity ROI

MDR services provide a cost-effective way to deliver round-the-clock threat hunting while greatly reducing the risk of a costly incident.

"Sophos MDR pays for itself in spades."
Hammondcare

SOPHOS
