VISION AND MISSION

**Why we exist.**

**Why Sophos**

**Why now**

**Why we win**

CISO

← The Cybersecurity Poverty Line

10,000

## OUR VISION

A world where the most trusted cybersecurity is also the most accessible.

## OUR MISSION

Erase the cybersecurity poverty line and democratize resilience by driving advances in technology and services, AI, and global threat intelligence.

# Sophos Strategy

## Portfolio

Build for the most demanding environments.  
Make it accessible to everyone.

## Channel

Scale through partners as the operating  
model, not just the route to market.

## Customer

Make outcomes the product  
and the system the proof.

## Operating Model

AI is the multiplier. People remain  
strategic and accountable.

## Culture

Build things that matter. Be people worth  
trusting. We are a company of builders.

## Proof Point

Scale that compounds into intelligence

600,000+ customers; every threat feeds the system

Human judgment at the control point

MDR analysts supervise AI, own critical decisions, and preserve trust

A defense system, not a stack

One architecture; detection anywhere triggers response everywhere

The strongest first line of defense

Autonomous protection stops threats before they become incidents

The most complete Microsoft security integration

Proprietary detection rules; surfacing threats that MSFT misses

## Why Sophos

We have identified  
the root cause

## Why now

We have named  
the inflection

## Why we win

We have built  
the system

# Content Hub

SOPHOS PORTFOLIO AND ROADMAP

# Introducing the AI-Native Defense System

## WHAT WE'LL COVER...

- The architecture of the industry's first AI-native defense system, **and why differentiated in the market.**
- The FY27 innovations that **expand your opportunity**, from Next-gen SIEM to Secure AI to CISO Advantage.
- Why together we **are positioned to to build the best Cyber Security outcomes** with both our **SMB and Enterprise customers.**

# SOPHOS CENTRAL

Managed by Customers | Managed by Partners | Managed by Sophos

## THREAT INTELLIGENCE

## UNIFIED DATA FABRIC

**AI-NATIVE DEFENSE SYSTEM**

# Sophos Central

The AI-Native Cybersecurity Defense System

## CONTROL POINTS

Native and third-party

Compounding Intelligence

Agentic autonomy + human accountability

Synchronized Security™

UNIFIED DATA FABRIC

## ✗ Product Stacks

(What they sell)

Data	Aggregated from siloed products	Single unified data fabric, real-time
AI Role	Feature layer bolted on top	AI is the architecture; remove it and the system must function differently
Response	Manual or playbook-driven automation across consoles	Synchronized; detection automatically triggers response everywhere
Intelligence	Static per-product models	Compounds across 600K+ organizations
Integration	Assembled via acquisitions	Native inside. Open outside. 350+ integrations

## ✓ Defense System

(What we built)

# Two Leaders. One architecture. The most complete defense system in cybersecurity.

## Unified XDR and Next-gen SIEM

Fully integrated into Sophos Central. One platform, one experience.

## Upgraded MDR Services

Combines the operational expertise of Sophos MDR and Taegis MDR.

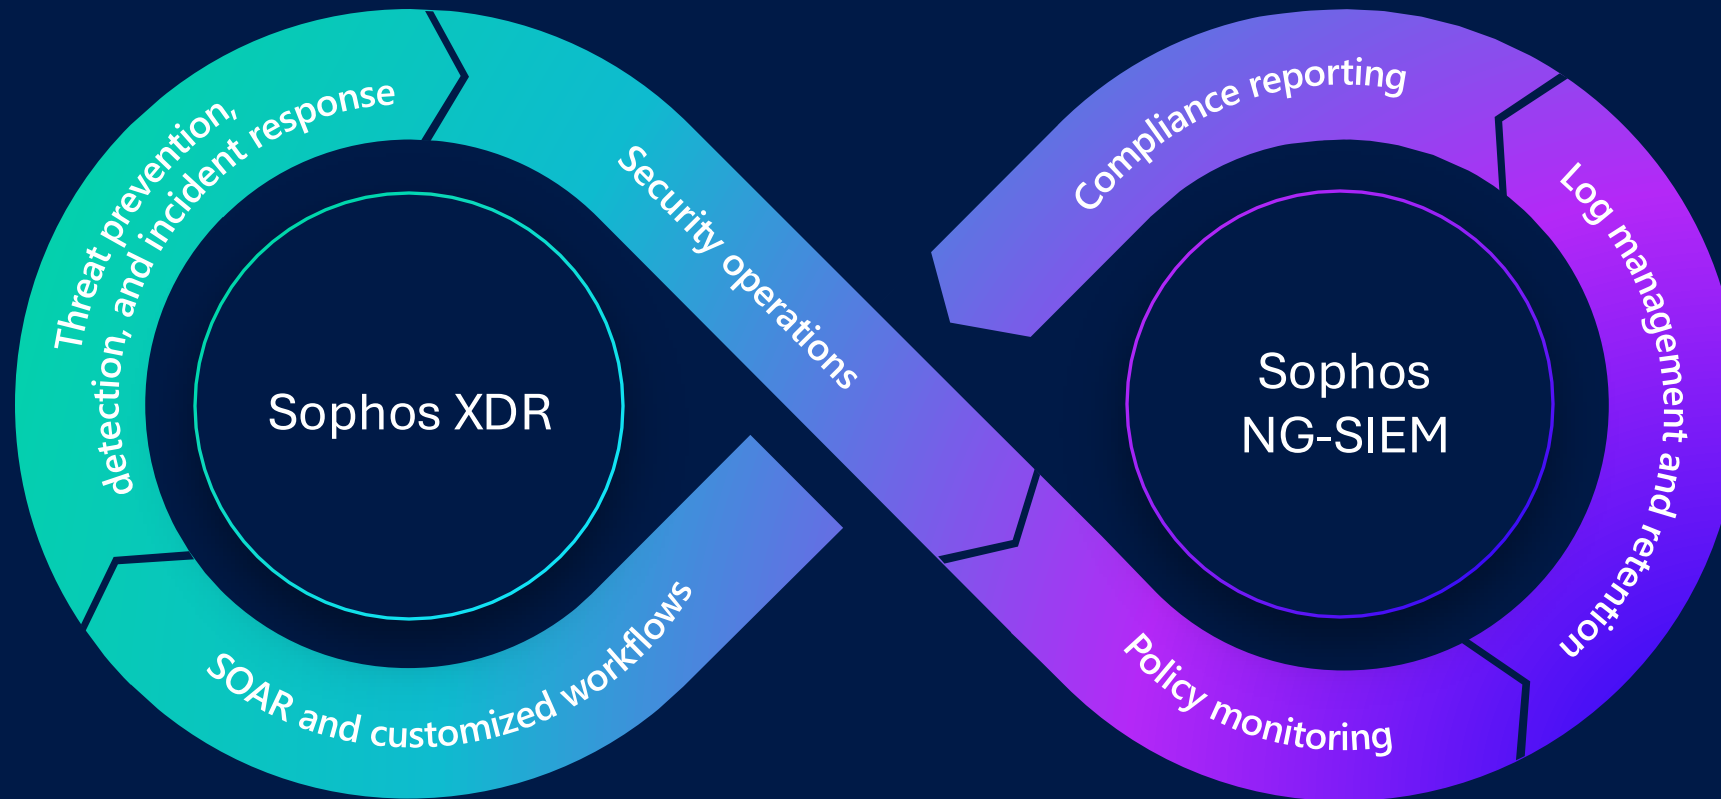

## Sophos X-Ops + Counter Threat Unit

Sophos threat research + Secureworks CTU = threat tracking across every layer

## 350+ Integrations and growing...

Open integration framework inherited from the Taegis platform

# Next-gen SIEM: A major growth opportunity

# Secure AI: Protecting the new attack surface

## VISIBILITY

See every AI tool across the environment

---

Shadow AI discovery  
AI usage dashboard  
Endpoint + Network + Browser  
multi-layer detection

## CONTROL

Enforce AI policy without slowing innovation

---

Granular access management  
Global policy enforcement  
Role-based controls  
Prompt monitoring

## PROTECTION

Defend data and block high-risk AI behavior

---

Input sanitization  
Output interception  
DLP for AI prompts  
MDR-managed AI risk 24/7

COMING OCTOBER 2026

# Sophos CISO Advantage

17x

A LEADER

**Protection**

Endpoint, Firewall, Email, Cloud,  
Workspace Protection

*The strongest first line of  
defense in the industry.*

**Detection &  
Response**

XDR, NG-SIEM, EDR, NDR,  
ITDR, SOAR

*Displace Splunk/Sentinel.  
Already integrated.*

**Managed Services**

MDR, Incident Response,  
Vulnerability Management

*37K+ MDR customers.  
World's largest operation.*

**Advisory Services**

Security Services Retainer

*On-demand expertise  
with built-in flexibility.*

**Secure AI**  
Coming in July

Visibility, Control, Protection  
for AI adoption

*Secure the new  
attack surface.*

**CISO Advantage**  
Coming in October

Risk assessment, compliance,  
peer benchmarking

*Strategic leadership and risk  
management as a service*

The system is built.  
The innovation is accelerating.  
Now we go win **together.**

# Accelerate your growth with Sophos

PROFITABILITY

SERVICES (MSP)

AI PARTNER AGENT

CAMPAIGNS

## MSP

For Partners who deliver Sophos security as part of a managed IT service, protecting customers day-to-day with simple, flexible, usage-based billing. Best suited to MSPs managing security alongside broader IT services for SMB and Mid-Market customers.

- Sophos Central at the heart of MSP Efficiency
- Usage Based Aggregated Billing – aligns costs and revenue
- MDR Bundles for MSPs – differentiation and scale
- Integrates seamlessly with RMM & PSA systems

**Manage \$6.84bn**  
(+10.9%)

Source: Omdia Cybersecurity  
Ecosystems, 2026

# More Choice. More Control.

## One Powerful Sophos MSP Program.

### MSP

Partnerships require valid Sophos reseller and MSP agreements

Partner-owned license entitlements

### MSP FLEX

Deliver Sophos cybersecurity solutions on a flexible, usage-based model.

#### REQUIREMENTS

- Complete your sales certification (SC01)
- Get approval for monthly billings with Disti of choice
- Use PSA/RMM tools and provide Level 1 support to your managed customers

Consumption-based billing in arrears

### MSP ELEVATE

Unlock exclusive MSP rewards: MDR bundles, 40% off hardware, free training, growth incentives and more.

#### REQUIREMENTS

- Meet the requirements of MSP Flex
- Minimum monthly spend of \$2,000 USD (or local currency equivalent)
- 12-month participation period

Accelerated discounts and benefits

# Accelerate your growth with Sophos

PROFITABILITY

SERVICES (MSSP)

AI PARTNER AGENT

CAMPAIGNS

## MSSP

For Partners provide security as a core, specialist service, delivering advanced threat detection and response such as MDR, often with 24/7 monitoring and security operations.

- Scale without building a platform
- Build MDR/XDR services faster (MTTR)
- Deliver outcomes, not just alerts
- Drive operational efficiency and resilience
- **NEW:** Certified Training available

**\$5.92bn (+7.8%)**

## ENDPOINT MARKET GROWTH (BILLIONS)

Source: Gartner, March 2026 model

LEAKED // CLASSIFIED

CAPYBARA TIER // BEYOND OPUS

# CLAUDE MYTHOS

Step-change AI model with unprecedented cybersecurity capabilities. What it means for defenders.

ANTHROPIC

# Qué es Claude Mythos y por qué esta IA provocó una cumbre urgente en Wall Street

El nuevo modelo de Anthropic se especializa en detectar fallos de ciberseguridad.

El logo de Claude. Getty

## Tecnología

INTELIGENCIA ARTIFICIAL >

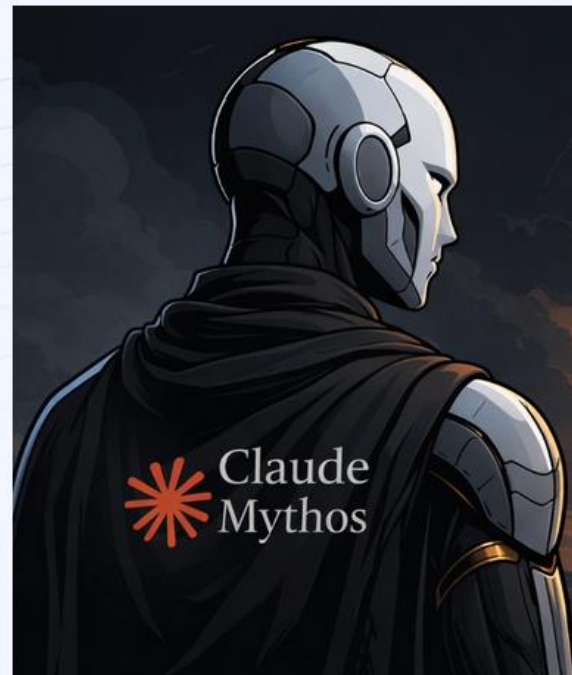

### Anthropic oculta su nuevo modelo de IA, Mythos, por ser demasiado peligroso

La compañía ha optado por ceder estrictamente su acceso a unas docenas de empresas escogidas para que lo usen para proteger su 'software'

TECNOLOGÍA

### La IA más avanzada de Anthropic que, de momento, solo podrán usar 40 empresas de seguridad

Actualmente en marzo, supera en un 25% el nivel de seguridad informática. Anthropic lo ha hecho disponible para el público general y lo ha ofrecido a socios seleccionados bajo el programa

Inteligencia Artificial

abril 13, 2026

## Claude Mythos no es el peligro, es la señal de lo que viene

# The vulnerability flood is here. Here's what it means – and how to prepare

We can't control the pace of AI-driven vulnerability discovery, but we can control how fast we respond.

<https://www.sophos.com/en-us/blog/vulnerability-flood-is-here>

# Technical Root Cause of Attacks

For the third year running, exploited vulnerabilities are the top-reported root cause of ransomware attacks

# Prevent threats from executing

## CryptoGuard

STOP RANSOMWARE THAT  
OTHER SOLUTIONS MISS

- Monitors files for malicious encryption
- Blocks local and remote attacks
- Automatic rollback of affected files
- Stops remote ransomware
- Doesn't depend on indicators of "bad"
- Master Boot Record (MBR) protection

## Adaptive Attack Protection

BLOCK THE ATTACKER'S NEXT  
MOVE BEFORE IT HAPPENS

- Detects "Hands-on-Keyboard" attacks
- Dynamically strengthens protections
- Blocks malicious actions / behaviors
- Prevents lateral movement
- Powered by Sophos X-Ops researchers
- Includes customizable controls

## Anti-Exploitation

REDUCE YOUR ATTACK SURFACE  
AND THREAT EXPOSURE

- Zero-day attack protection
- Real-time scanning
- Web protection
- Identify unpatched devices
- Protection for Office applications
- Pre-configured—no tuning required

# Reduce exposure to attack

## Web Protection and Control

Stops threats at the delivery stage by preventing users from being diverted to malware delivery or phishing websites.

Block access to undesirable or inappropriate content, such as adult and gambling websites.

## Peripheral Control

Monitor and block access to removable media, Bluetooth, and mobile devices to prevent certain hardware from connecting to your endpoints and network.

## Application Control

Block potentially vulnerable or unsuitable applications or applications used for nefarious purposes using Sophos' pre-defined categories, simplifying the process of monitoring and management.

## Data Loss Prevention

Monitors and restrict the transfer of files containing sensitive data.  
For example, prevent employees from sending confidential files home using web-based email.

**THE THREAT HAS BECOME AI-NATIVE  
YOUR DEFENSE NEEDS TO BE AI-NATIVE TOO**

**MODERN PROTECTION FOR  
MODERN THREATS**

**PROTECTION AND  
PERFORMANCE**

**ADAPT WITH ADVERSARIAL

# LOLBin prevalence (2025)

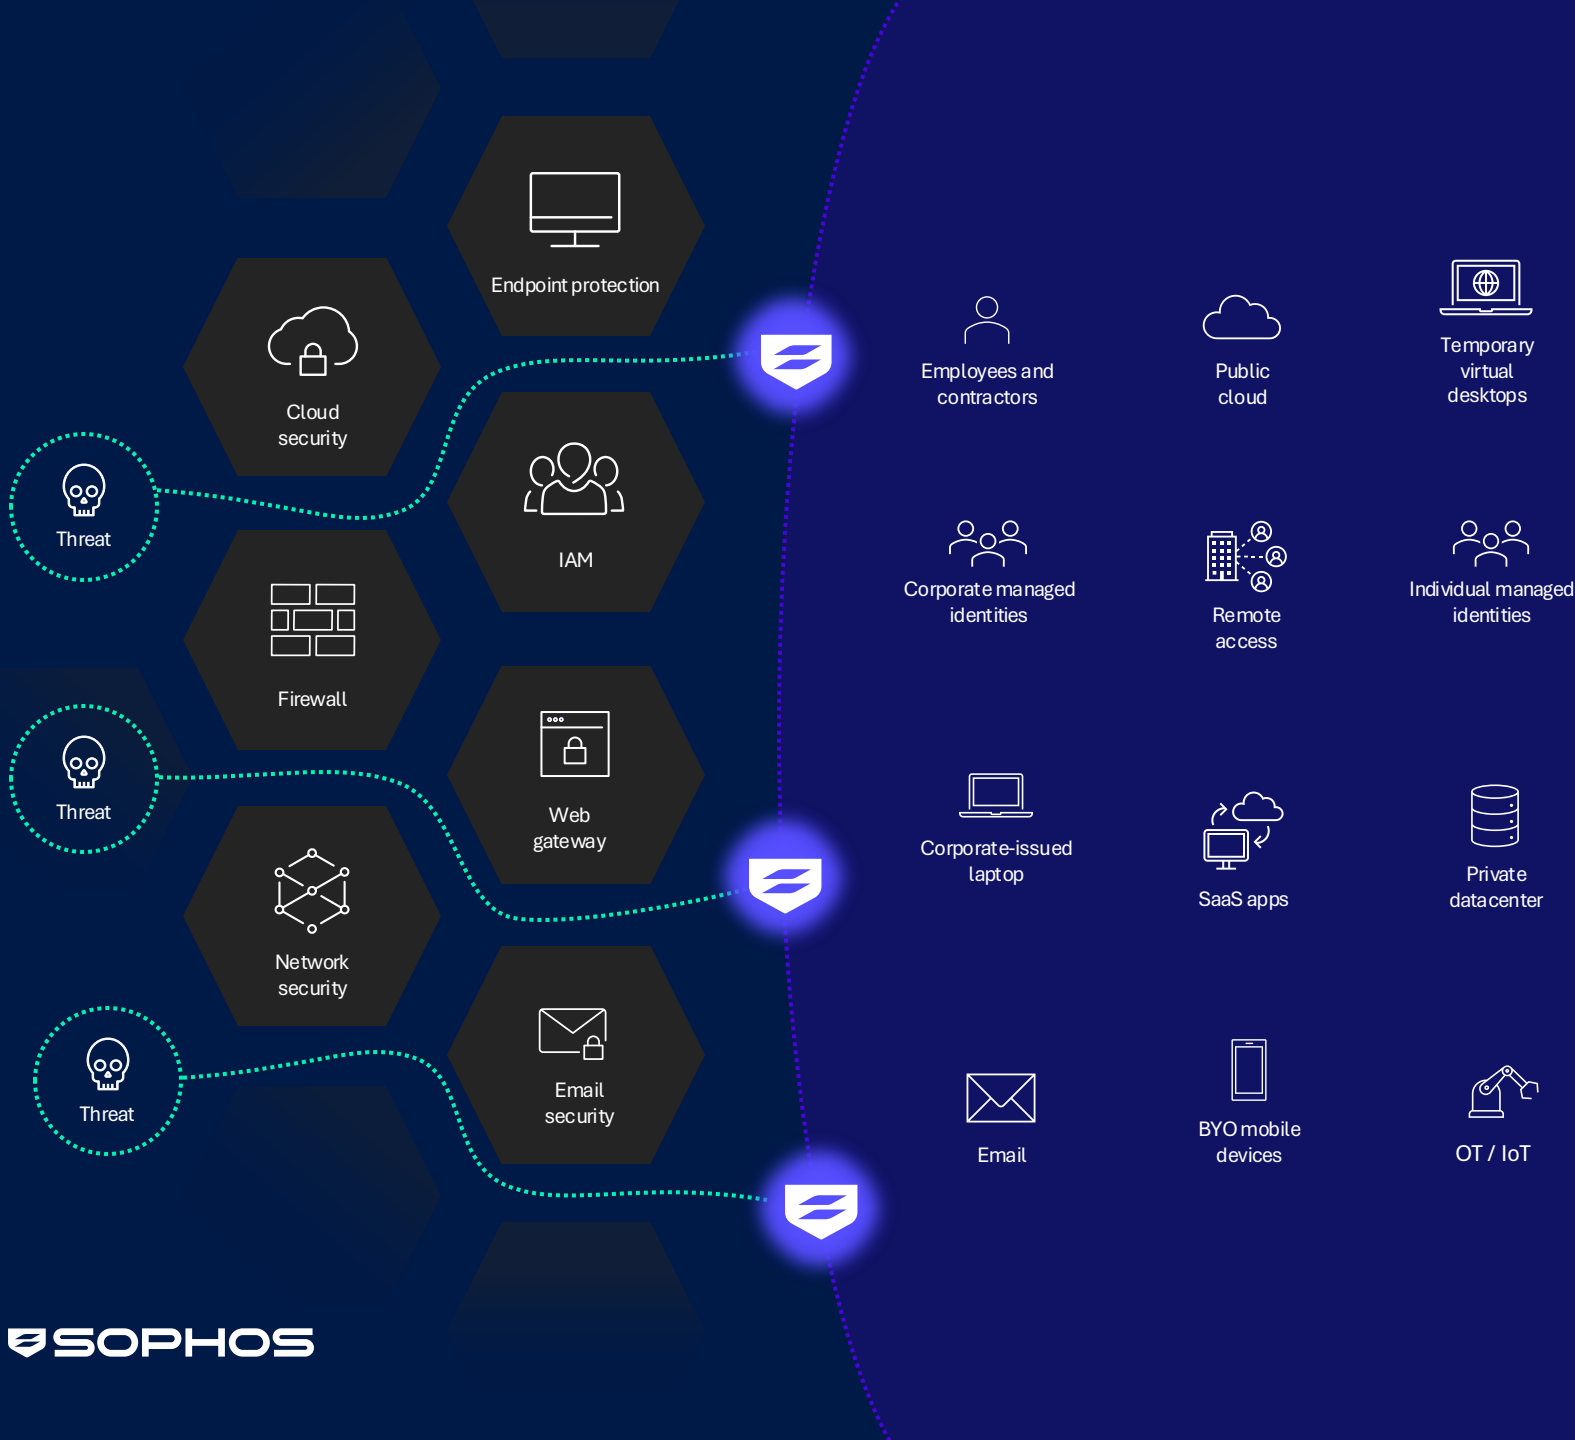

# Sophos XDR

eXtended Detection and Response

# XDR protects the modern attack surface

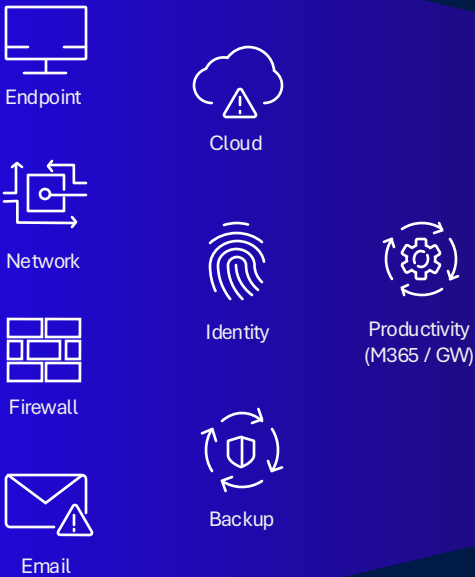

Sophos XDR covers the gaps in point-security controls that adversaries attempt to exploit.

Our AI-native open platform unifies information from multiple security products to automate and accelerate threat detection, investigation, and response in ways that isolated point solutions cannot.

# AI-powered prevention, detection, and response platform

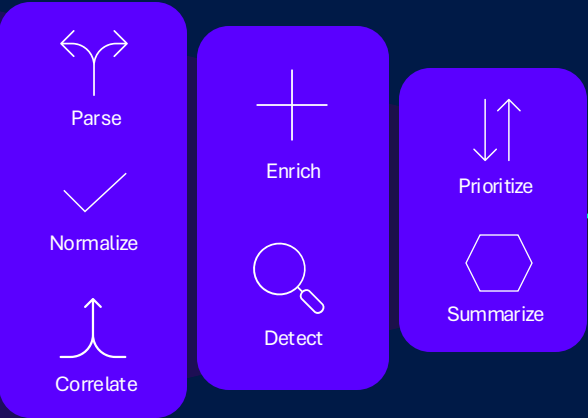

## Event sources

Turnkey integrations with Sophos and non-Sophos tools and technologies

## Analysis and correlation

Threat intelligence, automated response, advanced threat analytics

## Threat response

### 24/7 managed detection and response services

Sophos MDR experts hunt, investigate, and eliminate attackers on your behalf

**38 mins** Average time to fully remediate a threat

### AI-native investigation and response platform

Sophos XDR is your single platform for investigation, reporting, and management

**Self-manage** or collaborate with the Sophos MDR team

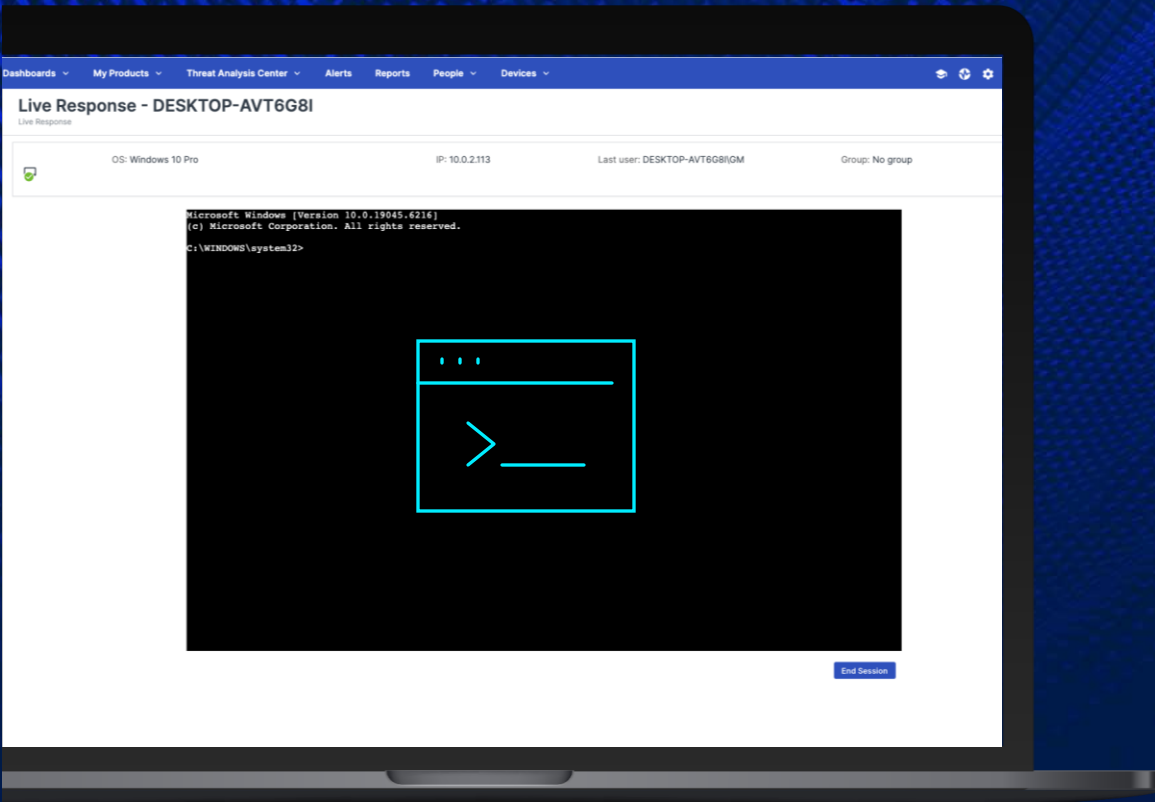

# Visibility across all attack surfaces

Our analysts can leverage your existing technology investments to detect and respond to threats.

# Live Response

- **A direct, secure, and audited** connection to your devices to investigate and remediate possible issues
- Remotely access devices to
  - Install and uninstall software
  - Run scripts and programs
  - Edit configuration files
  - Shutdown / reboot
  - Run third-party forensic tools
  - And more

# Path to growth and profitability

## SECURITY OPERATIONS

DETECT | INVESTIGATE | RESPOND

### Open, vendor-agnostic system

Integrate your IT and security tools for full visibility and powerful response actions.

### Superior protection built-in

Block more threats upfront to free-up analysts to focus on what matters most.

### Powerful threat detection

Identify multi-stage, multi-vector attacks with comprehensive detectors and customizable detection rules.

### AI-native SOC

Accelerate analyst workflows and decision-making with AI architecture.

### Automation (SOAR)

Respond to threats and automate common tasks like ticketing.

### Integrated threat intelligence

Stay ahead of emerging threats with actionable intelligence at your fingertips.

## COMPLIANCE

RETAIN | REPORT | PROVE

### Flexible data integrations

Ingest data that meets your organization's unique needs.

### Extended, long-term telemetry

Retain multi-domain telemetry for up to 10 years.

### Predictable data retention at scale

Retention through simple endpoint-based pricing.

### Reliable security and compliance data

Ingest both threat-related and compliance-focused data.

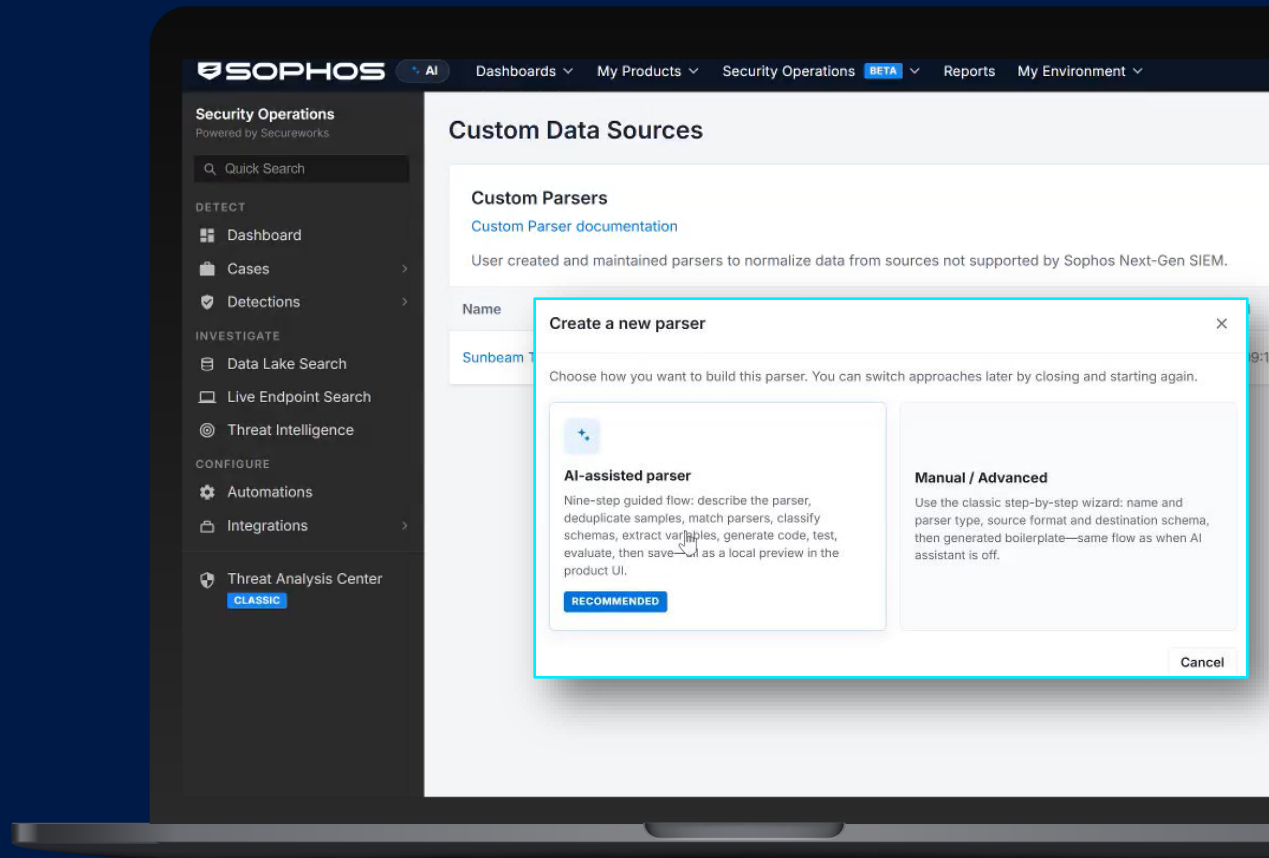

UNIFIED CONTEXT LAKE

# Custom integrations + AI-assisted data parsers

Ingest data **unique to your environment** with custom integrations, including legacy systems, regional tools, and internal applications.

- Enables a single search model and prevents data sprawl across disparate systems.
- Parsers turn raw data into structured fields aligned to Sophos schemas.
- **AI-assisted parsers** generate logic based on examples, enabling faster customizations.

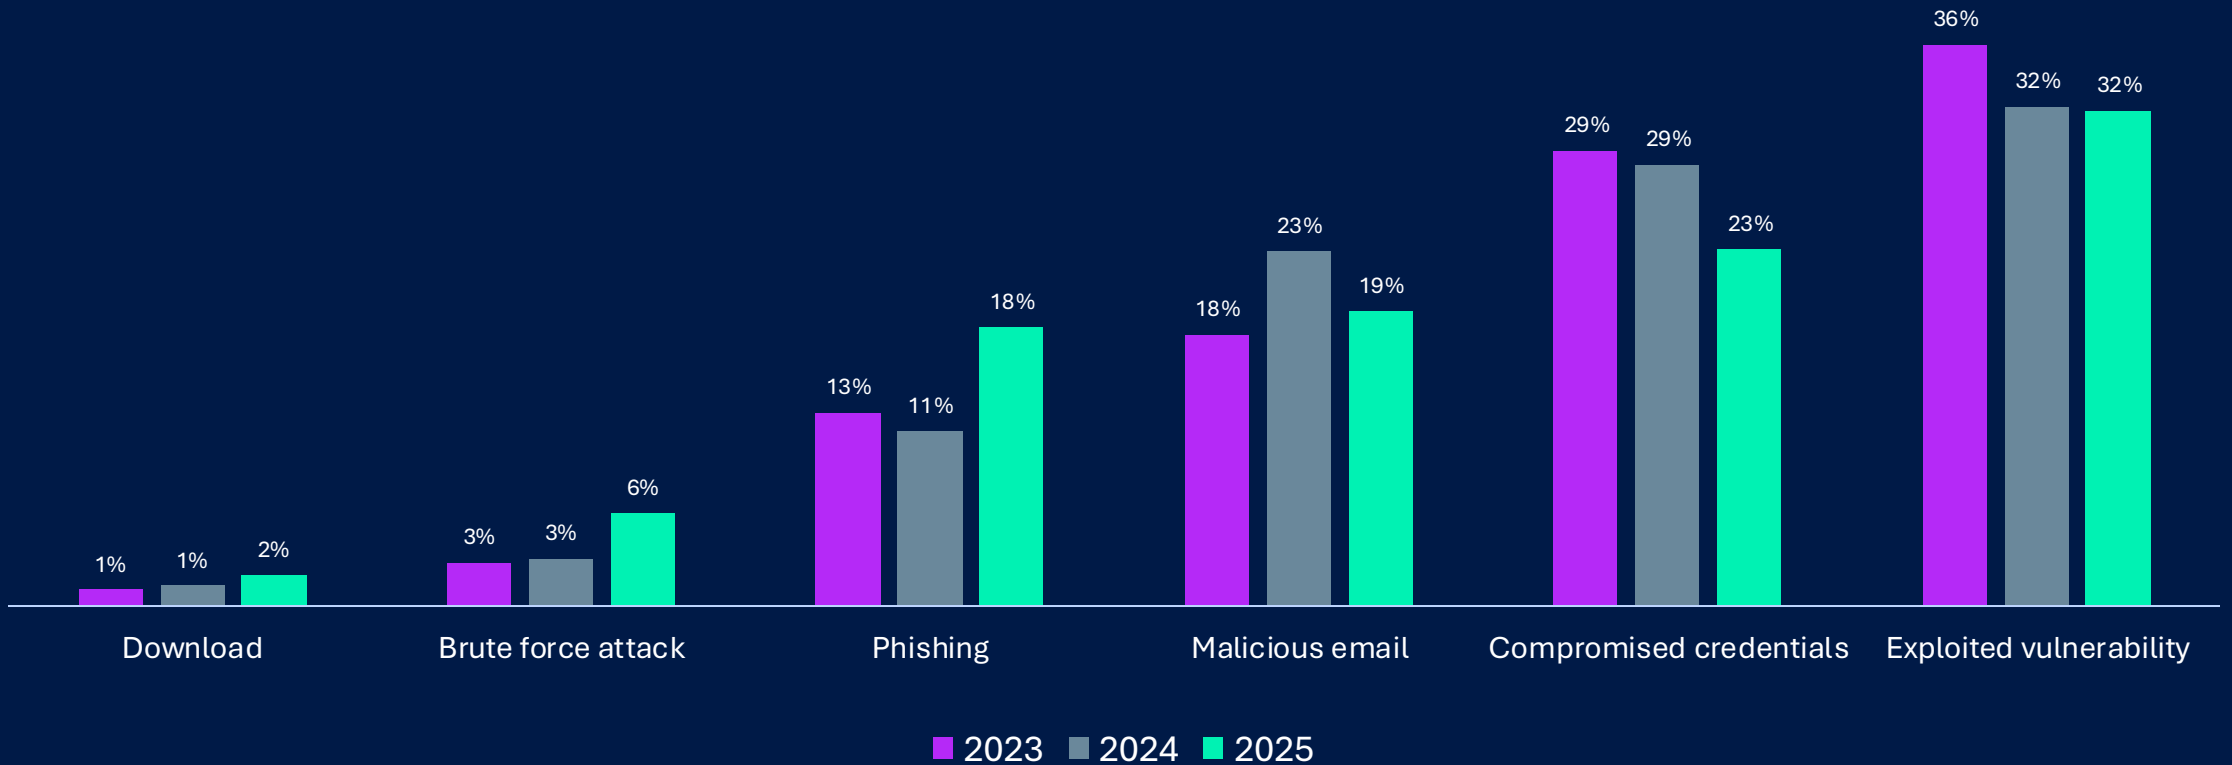

# Path to growth and profitability

# Technical Root Cause of Attacks

For the third year running, exploited vulnerabilities are the top-reported root cause of ransomware attacks

# Technical Root Cause of Attacks | Company Size

Perceived root cause varies based on organization size, although exploited vulnerabilities are the most common cause for all segments except the 100-250 employees, where compromised credentials tops the list.

# Sophos ITDR

Identity Threat Detection and Response

**PARTNER  
EXPERIENCE**

### IAM misconfigurations

95% of organizations have a critical Microsoft Entra ID identity misconfiguration.

Source: incident response engagements conducted by Sophos

### Identity-based attacks

90% of organizations experienced an identity breach in the past year.

Source: IDSA Trends in Securing Digital Identities, 2024

### Leaked and stolen credentials

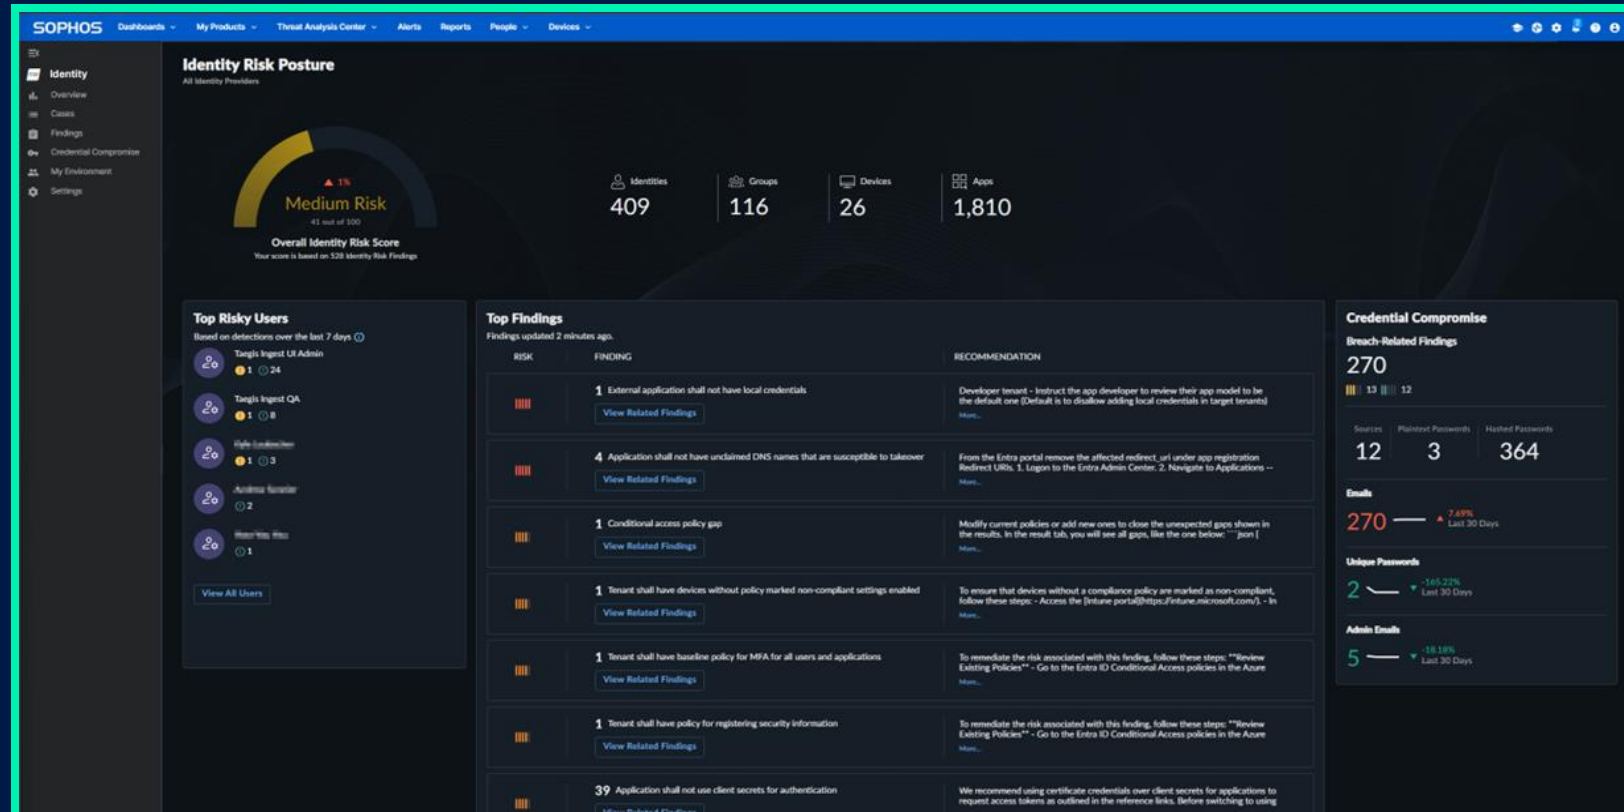

The number of stolen credentials for sale on the dark web has more than doubled in the past year.

Source: Sophos X-Ops Counter Threat Unit (CTU) data, June 2024 – June 2025

# Reduces the identity attack surface

Continuously scans Microsoft Entra ID for identity misconfigurations and risks

- Produces a prioritized list of “Findings” that pose a risk to your organization with recommended actions
- Provides an identity posture score to help you understand risk and benchmark over time
- Automatically performs 80+ identity posture checks

# Identifies risky user behaviors

Highlights abnormal activity associated with the use of stolen credentials

- Provides a list of users that have been recently involved in Sophos security alerts
- Enables quick analysis from within the identity details page
- Highlights abnormal activity such as:
  - Unseen IP address for tenant
  - Unseen ASN for tenant
  - Unseen IP address for user
  - Unseen ASN address for user
  - Unseen user agent

**Top Risky Users**  
Based on Recent Alerts for the User

# Minimizes stolen credential risk

Monitors and alerts when credentials have been exposed

- Finds credentials leaked on the dark web and within breach databases
  - Reduces the risk of credential stuffing attacks and credential misuse
- Provides insights and trends around:
  - The number of breaches
  - Unique passwords breached
  - Types of breaches observed
  - Admin accounts
- Explore historical leak data using the Credential Compromise explorer
- Correlates with last password change time and MFA configuration for improved accuracy

**Credential Compromise**  
All Identity Providers

# Reducing Identity Risk with Sophos ITDR

A powerful new add-on for Sophos MDR and Sophos XDR

**Protects against identity threats**

Detect and responds to sophisticated identity-based threats

**Reduces the identity attack surface**

Continuously scans Microsoft Entra ID for identity security gaps

**Minimizes stolen credential risk**

Monitors and alerts when credentials have been exposed

**Identifies risky user behaviors**

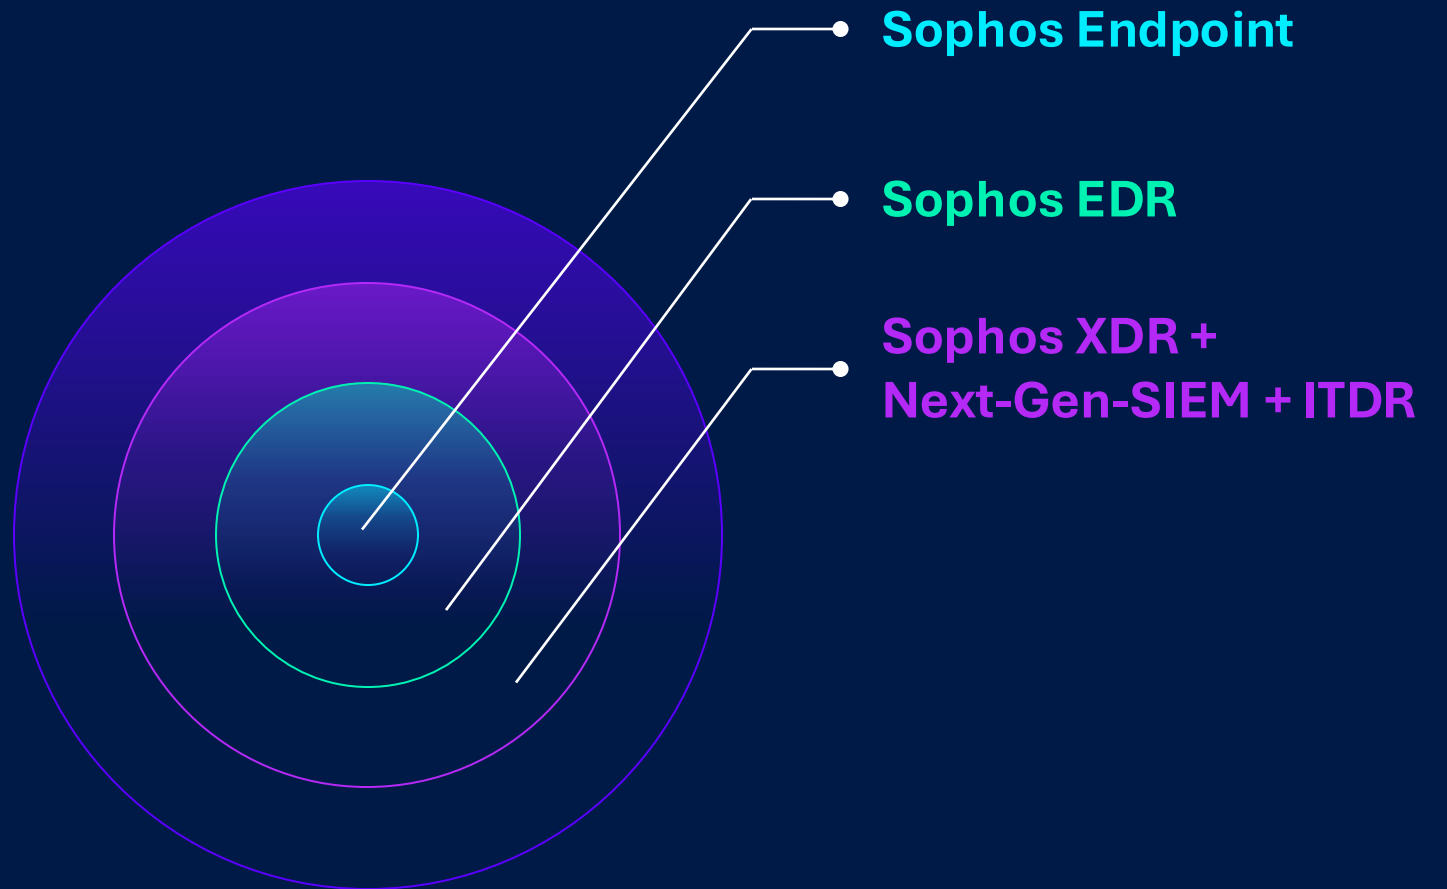

Monitors for abnormal activity associated with stolen credentials

MDR/XDR

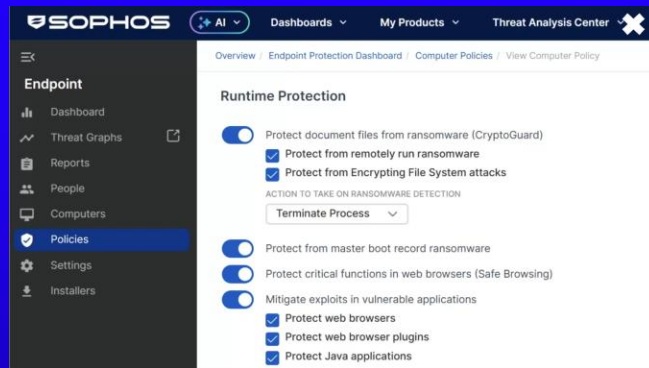

Identity Threat Detection and Response (ITDR) Add-on

# Path to growth and profitability

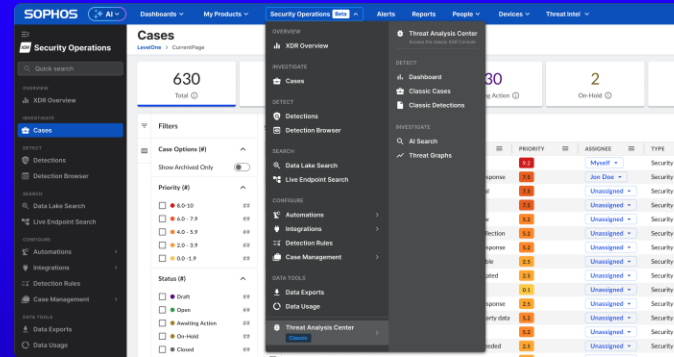

# Sophos Platform and Services

## Endpoint

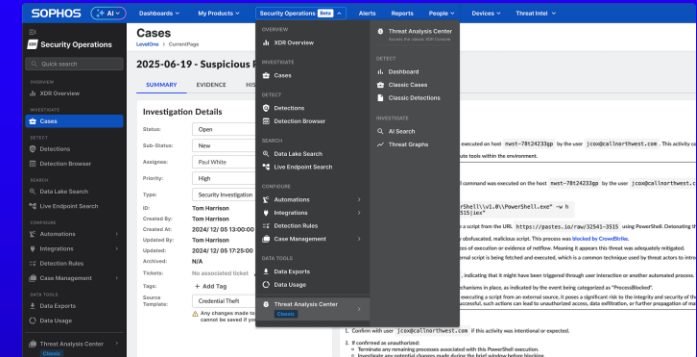

Sophos Endpoint delivers unparalleled defense against advanced cyberattacks with best-in-class endpoint security to over 300,000 organizations worldwide.

## EDR/XDR + NGSIM + ITDR

XDR is a cybersecurity technology and architecture that integrates and correlates telemetry and threat data from multiple security layers — including endpoints, networks, email, identities, and productivity tools — into a unified platform. XDR enhances visibility, accelerates threat detection, and enables faster incident investigation and response across previously siloed systems.

## MDR

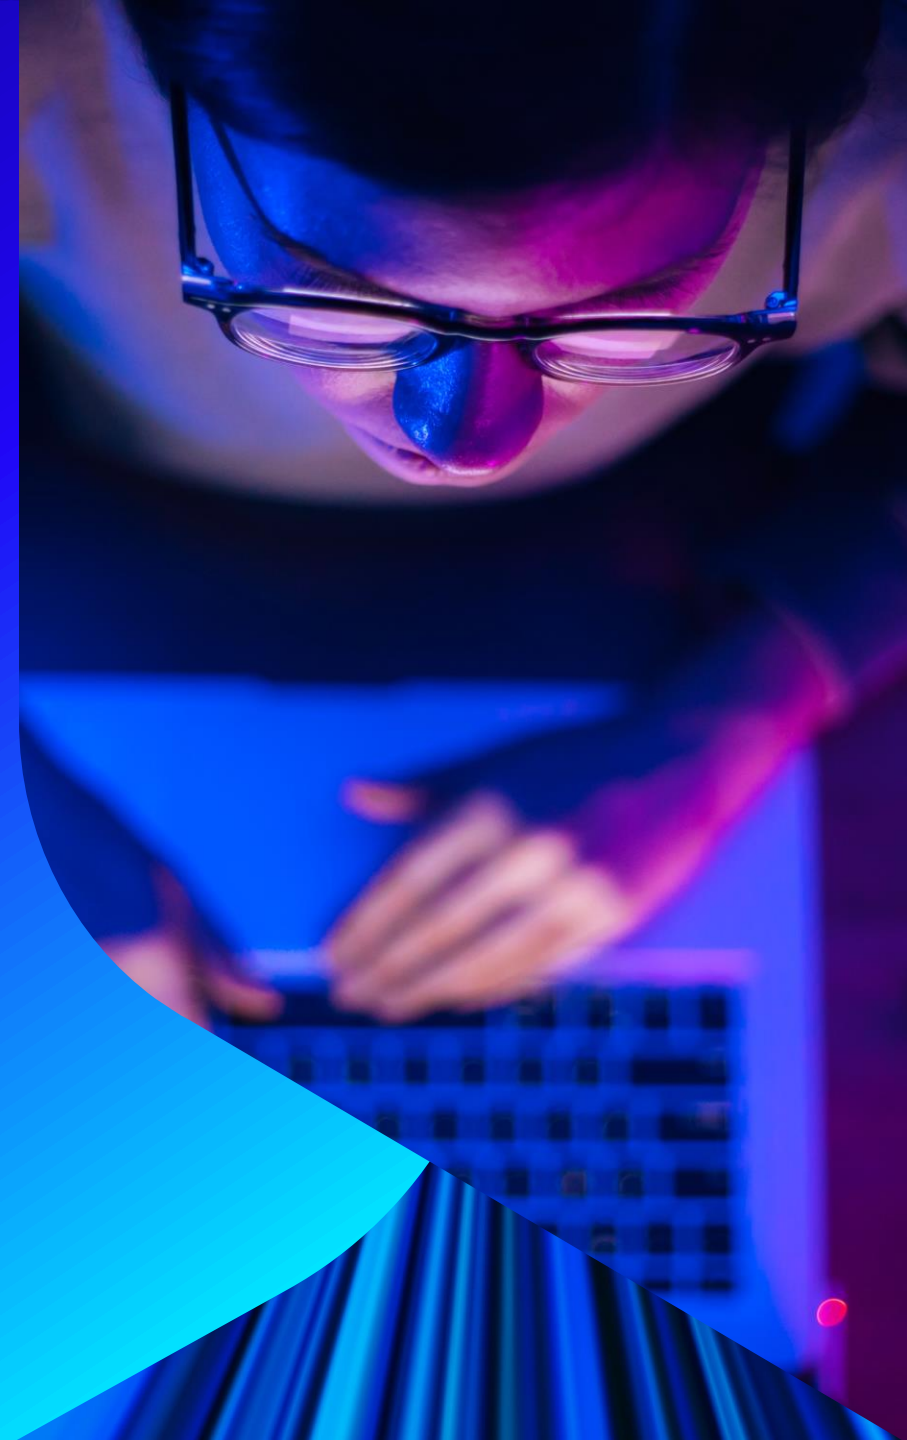

Sophos MDR is the world's most trusted 24/7 managed detection and response service, delivered by experts who specialize in detecting and responding to cyberattacks that technology solutions alone cannot prevent, across your entire IT ecosystem.

# Sophos MDR

## Managed Detection and Response

# 24/7 global analyst coverage from nine regional hubs

# Sophos MDR | Industry-leading advanced cyber defense

## Monitor for advanced threats 24/7

Our highly skilled experts hunt for, detect, triage, investigate, and respond to threats on your behalf, delivered by 8 global Security Operations Centers (SOCs).

## Detect threats across your environment

We leverage telemetry from your IT and cybersecurity solutions to identify suspicious activity at the earliest possible opportunity – and increase return on your security investments.

## Respond to attacks before they can progress

We have an industry-leading average threat response time of 38 minutes — 96% faster than the industry benchmark for in-house SOC teams.

## Neutralize adversaries and identify root cause

Unmetered full Incident Response (IR) coverage with no hourly limits. Active threats are neutralized and root cause identified to improve security posture.

# Sophos MDR is built on the largest AI-native open platform

**223 terabytes**  
Telemetry processed daily

**34 million**  
Detections generated daily

**11 million**  
Threats blocked  
daily

**1,101**  
MDR investigations completed  
daily

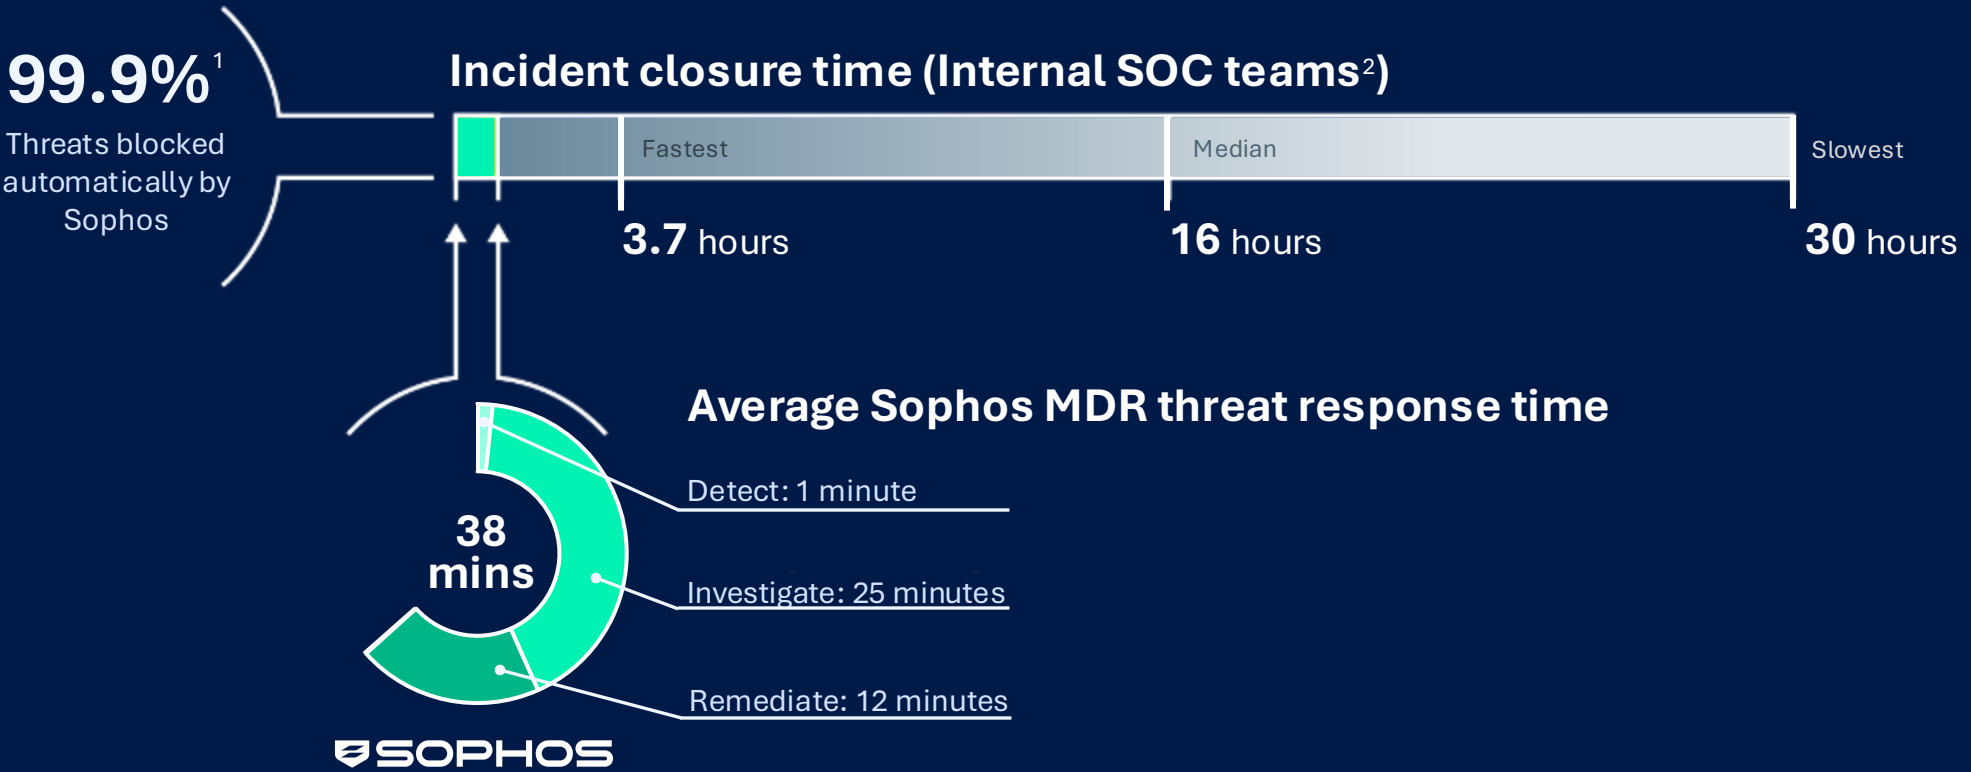

**231**  
Attacks stopped by MDR  
Every. Single. Day.

Our unique **prevention-first** approach reduces breaches and improves detection and response outcomes.

Learnings from investigations and attacks stopped by Sophos MDR **drive enhancements** to proactive protection.

# Leading detection and response times

Sophos MDR analysts **respond to threats in minutes** — whether you need full-scale incident response or assistance making more accurate decisions.

# Sophos MDR

**40,000 +**  
Customers Globally

A vast, diverse customer base provides unparalleled intelligence and proactive threat defense.

**1,101** Investigations  
completed daily

Our highly skilled experts monitor, triage, investigate, and respond to threats on your behalf.

**231** Advanced attacks  
stopped every day

Learnings from attacks stopped by Sophos MDR drive enhancements to proactive protection.

## Global analyst coverage

## Tested. Recognized. Trusted.

MDR MARKET GROWTH (BILLIONS)

**MDR is not a line item.  
It's the center of your practice.**

Source: IDC 2025, model

# Vendor-agnostic. Partner-centric.

## SELL FLEXIBLE SOLUTIONS

Sell Sophos MDR with the solutions you already offer to your customers.

## LAYER SERVICES

Offer services around data integrations and automated response workflows.

## INCREASE DEAL SIZES

Expand MDR opportunities with ITDR, NDR, Next-Gen SIEM, and more.

# Sell with confidence across every segment

Win new business. Retain customers. Expand accounts. Across your entire customer base.

## COMMERCIAL

1-99 seats

**Security outcomes without security staff.**

Highly targeted, limited staff, and unable to monitor 24/7 — creating immediate demand for MDR.

## MID-MARKET

100-1000 seats

**24/7 defense across a growing attack surface.**

Small teams overwhelmed by alerts and complexity need a trusted provider to own security operations outcomes.

## ENTERPRISE

1000+ seats

**AI-native MDR for complex, multi-layer environments.**

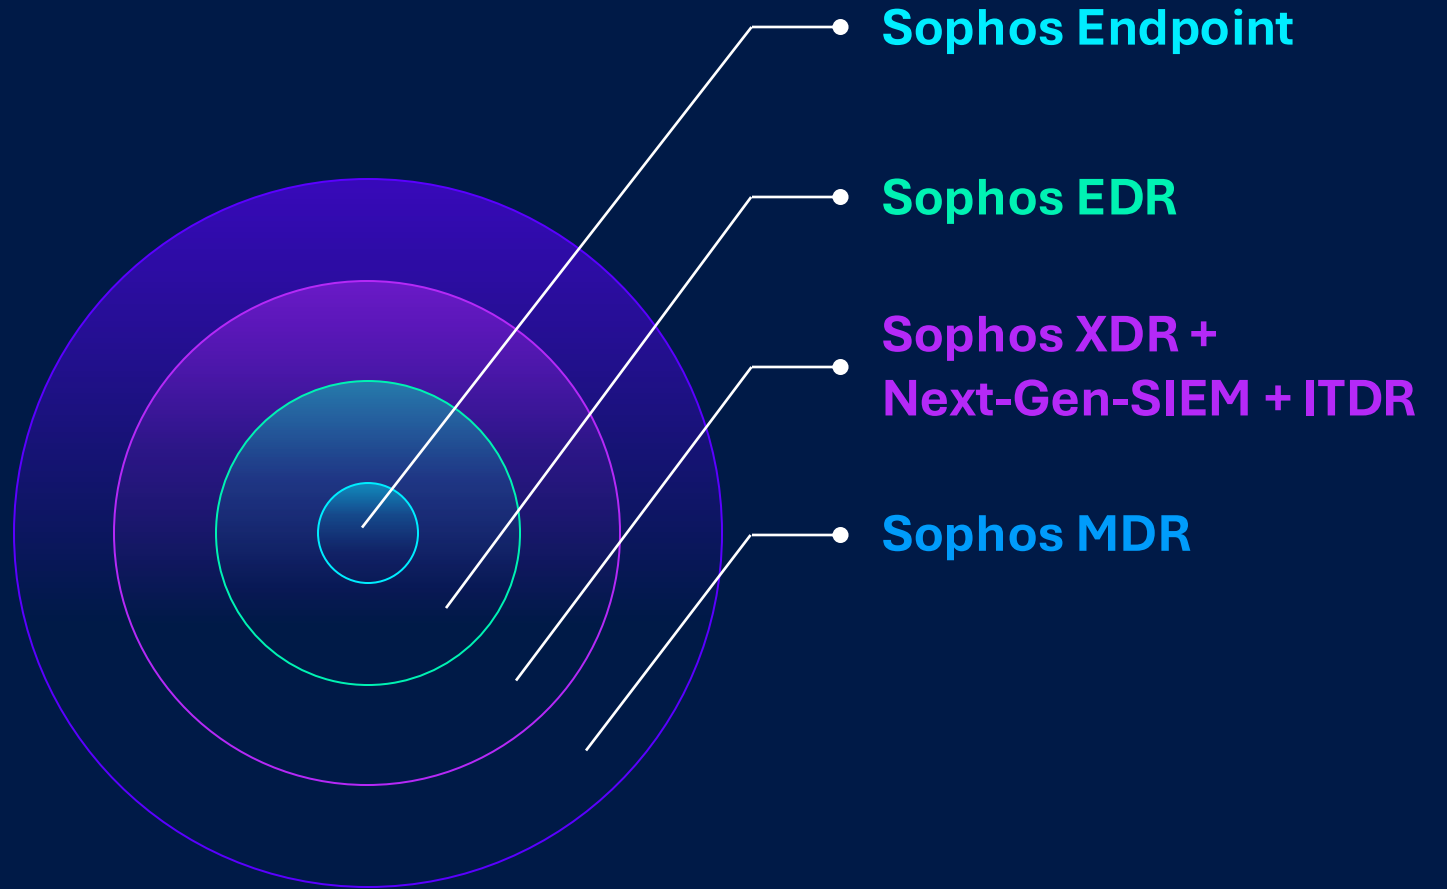

Organizations running multiple solutions struggling with visibility, compliance, and operational overhead.

High urgency — fast close.  
Delivers strong recurring revenue with low overhead.

Natural security operations upsell from endpoint and firewall. Clear expansion path as customers grow.

Larger deals — longer cycles.  
Target customers with fragmented stacks and compliance requirements.

# Domain DMARC Score

[View full report here](#)

Domain Score for **dominio.net**

## MODERATE RISK

You've got some measures in place to shield recipients from harmful emails coming from your domain. But there's opportunity to strengthen your domain's security even more. Taking these steps can boost trust in your brand, keep your business and stakeholders safe from cyberattacks, and help ensure emails are delivered effectively.

### Overall Score

Impersonation

SERVICE OVERVIEW

# SOPHOS MANAGED RISK

Powered by  **tenable**<sup>®</sup>

# Comprehensive attack surface vulnerability management

Powered by Tenable technology, Sophos Managed Risk delivers both external and internal attack surface management (EASM and IASM) in a single managed service. Discover your entire digital footprint and define your critical assets to focus on what matters most.

## External Attack Surface Management (EASM)

Discovers internet-facing assets and the exposures they may present.

## Internal Attack Surface Management (IASM)

Discovers risks posed by internal assets (e.g., computers, servers, network devices, and more) using authenticated and unauthenticated vulnerability scanning.

DEFINED CRITICAL ASSETS

# Service onboarding

## Day 1: Onboarding

An intuitive wizard in Sophos Central guides you through the simple steps to provide your authorized contacts and schedule automated scans.

## Day 30: Baseline review

An initial baseline review meeting enables the Sophos team to understand what's important to your organization and review the results of your first scans.

## Quarterly reviews

Live meetings with the Sophos Managed Risk team to review recent findings, learn about the current exploitation landscape, and agree remediation priorities.

# Comprehensive reporting

Stay informed and plan your remediation actions.

Eliminate blind spots with external attack surface, internal discovery, and vulnerability scan reports.

Comprehensive vulnerability scan results, prioritized by risk to your organization, with focus on your defined critical assets.

Links to vulnerability documentation for additional information and remediation guidance.

Interactive reports provide vulnerability data in an intuitive view.

## Risk factor

Weighted Average CVSS Score: 7.6

*\* For CVEs published in the last 10 years*

**Vulnerabilities by type & year**

Firewalls remain  
**vulnerable** long after  
patches are released

**322  
days**

Median time between a vendor publishing an advisory or patch and an attacker exploiting that flaw.

# A new Era of AI-driven attacks

DRAMATICALLY CHANGING THE THREAT LANDSCAPE

## Anthropic Claude Mythos:

- A new AI model to discover exploitable software vulnerabilities
- In just 7 weeks of testing, Mythos discovered over 2000 previous unknown zero-day vulnerabilities
- It can autonomously identify vulnerabilities and generate working exploits across all operating systems at machine speed
- It presents a huge opportunity but also an enormous risk

# Ya está aquí GPT-5.5-Cyber ¿Qué supone para los defensores que trabajan en primera línea?

El lanzamiento de GPT-5.5 por parte de OpenAI el 7 de mayo y la vista previa limitada de GPT-5.5-Cyber ponen la IA de vanguardia en manos de defensores verificados. Como miembro del programa Trusted Access for Cyber, Sophos está utilizando estos modelos para perfeccionar lo que ya tenemos en marcha: un SOC autónomo que resuelve más de la mitad de los casos sin intervención humana, y una arquitectura de endpoints diseñada específicamente para detener los ataques de día cero generados por IA.

Trusted Access for Cyber Program

# The vulnerability flood is here. Here's what it means – and how to prepare

We can't control the pace of AI-driven vulnerability discovery, but we can control how fast we respond.

April 9, 2026

# Together, We Share the Responsibility

## Secure by Design

Over-the-air hotfixes, proactive monitoring, health check, securely encrypted backups and updates, etc.

## Visibility and Control

Synchronized Security cross-product integration and automated response, visibility into AI usage, support for remote and hybrid working scenarios, network stack

## Constantly Adding Value

Many new releases introduce new features and improved performance at no extra cost, e.g., NDR Essentials, DNS Protection, Active Threat Response

## Your Benefits

Accelerated, proactive remediation with no additional overhead, monetizable health check, increased trust

## Your Benefits

Cross-sell opportunities via ecosystem, chance to support customers' AI-adoption and zero-trust transitions, Workspace Protection greenfield

## Your Benefits

Demonstrate customer ROI over the full lifecycle of the product, easier to position higher-value bundle and incentivize upgrades, helps with customer retention

# The new AI era

## Speed

Accelerated speed of discovery and attack

## Scale

Unprecedented vulnerabilities and patching

## Scope

Dramatic lowers the barrier of entry for adversaries

Protecting your network and a Secure by Design firewall is more important than it ever has been.

# A Strong Value Proposition For All Market Segments

## Commercial

1 - 99 seats

All-in-one, no-compromise protection  
at an attractive price point

---

Network-in-a-Box  
(Sophos Firewall, switches, wireless)

## Mid-Market

100 - 1,000 seats

Consolidate, simplify, and save  
Best protection and performance  
Constantly adding value

---

Consolidate, Simplify, and Save  
(Firewall with SD-WAN, Access,  
Workspace, Email)

## Distributed Enterprise

1,000 seats

Powerful performance and protection  
Integrated detection and response  
Unified management

---

Sophos Firewall with NDR and purpose-  
built MDR/XDR integration with Active  
Threat Response and Sync Security

# Sophos Firewall v22 | Secure By Design taken to a new level

**Secure By Design**  
Hardened against attacks

**Proactive Monitoring**  
by Sophos

Continuously monitoring system integrity to identify and respond to attacks sooner

**Automated Hotfixes**

Eliminate patch fatigue

Over-the-air security patches applied automatically with no down time

**MFA/ZTNA**  
Prevent attacks with compromised credentials

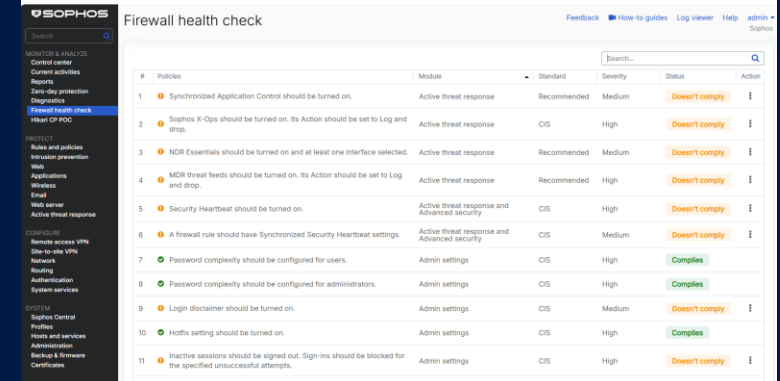

- ✓ MFA integrated across all areas of the firewall
- ✓ ZTNA gateway integrated into the firewall makes deployment easy

**Health Check**

Mitigate the risk of misconfiguration

Continuously monitors dozens of configurations against best-practices

#	Policy	Module	Standard	Severity	Status	Action
1	Synchronized Application Control should be turned on.	Active threat response	Recommended	Medium	Doesn't comply	!
2	Sophos X-Ops should be turned on. Its Action should be set to Log and drop.	Active threat response	CIS	High	Doesn't comply	!
3	NDR Essentials should be turned on and at least one interface selected.	Active threat response	Recommended	Medium	Doesn't comply	!
4	MDR threat feeds should be turned on. Its Action should be set to Log and drop.	Active threat response	Recommended	High	Doesn't comply	!
5	Security Heartbeat should be turned on.	Active threat response and Advanced security	CIS	High	Doesn't comply	!
6	A firewall rule should have Synchronized Security Heartbeat settings.	Active threat response and Advanced security	CIS	Medium	Doesn't comply	!
7	Password complexity should be configured for users.	Admin settings	CIS	High	Complies	
8	Password complexity should be configured for administrators.	Admin settings	CIS	High	Complies	
9	Login disclaimer should be turned on.	Admin settings	CIS	Medium	Doesn't comply	!
10	Hotfix setting should be turned on.	Admin settings	CIS	High	Complies	
11	Inactive sessions should be signed out. Sign-ins should be blocked for the specified unsuccessful attempts.	Admin settings	CIS	High	Doesn't comply	!

**Secure Xstream Architecture**  
Eliminate entire classes of vulnerabilities

- ✓ Hardened kernel
- ✓ Secure control plane
- ✓ Process isolation

## Competitive Firewall Displacement

HW + LICENSES + SERVICES  
AND REDUCE ADMIN OVERHEAD

## Sell the Full Stack

INCL. WORKSPACE PROTECTION  
MANAGED FROM A SINGLE CONSOLE

## MDR Cross-sell

SELL MDR/EP TO FW CUSTOMERS  
SELL FW TO MDR/EP CUSTOMERS

# Config Studio

View, edit, compare, test, and analyze your Sophos Firewall configurations. Your data stays private. All processing happens locally on your endpoint.

Get started 

Use of the Sophos Firewall Config Studio is governed by the [Sophos End User Terms of Use](#).

## What would you like to do?

### Configuration report

- Human-readable report
- Export to HTML or PDF
- Policy test and analysis
- Global search

### Compare configurations

- Side-by-side diff view
- Track added and removed settings
- Entity-level change tracking
- Export comparison results

### Configuration editor

- Visual rule and object editor
- Bulk edit with IntelliSense
- Preview generated XML
- Download XML or TAR

### Migrate to Sophos Firewall

- Sophos Firewall and Sophos UTM
- SonicWall, FortiGate, and Palo Alto
- Runs entirely in your browser

## Competitive Firewall Displacement

HW + LICENSES + SERVICES  
AND REDUCE ADMIN OVERHEAD

## Sell the Full Stack

INCL. WORKSPACE PROTECTION  
MANAGED FROM A SINGLE CONSOLE

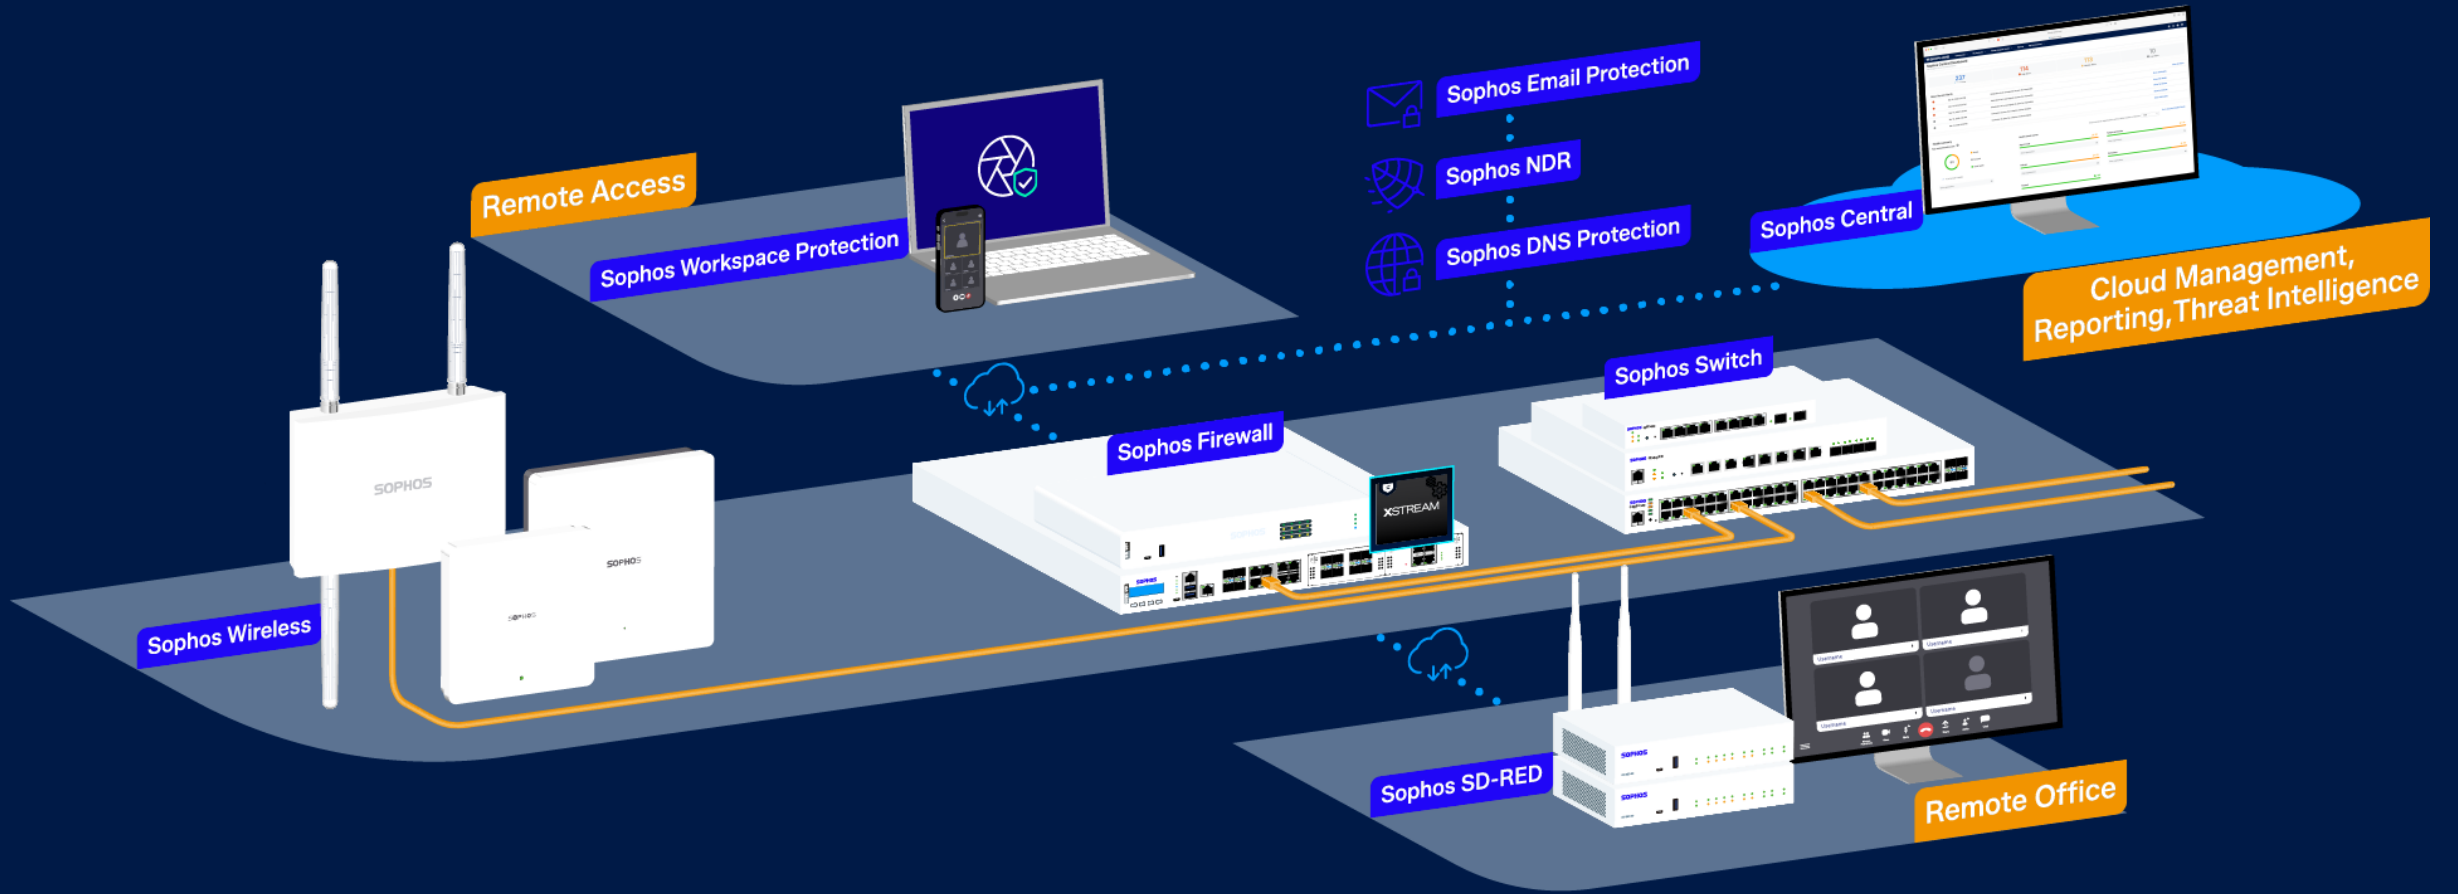

## MDR Cross-sell

SELL MDR/EP TO FW CUSTOMERS  
SELL FW TO MDR/EP CUSTOMERS

# Sophos Network Security

*Much more than a firewall*

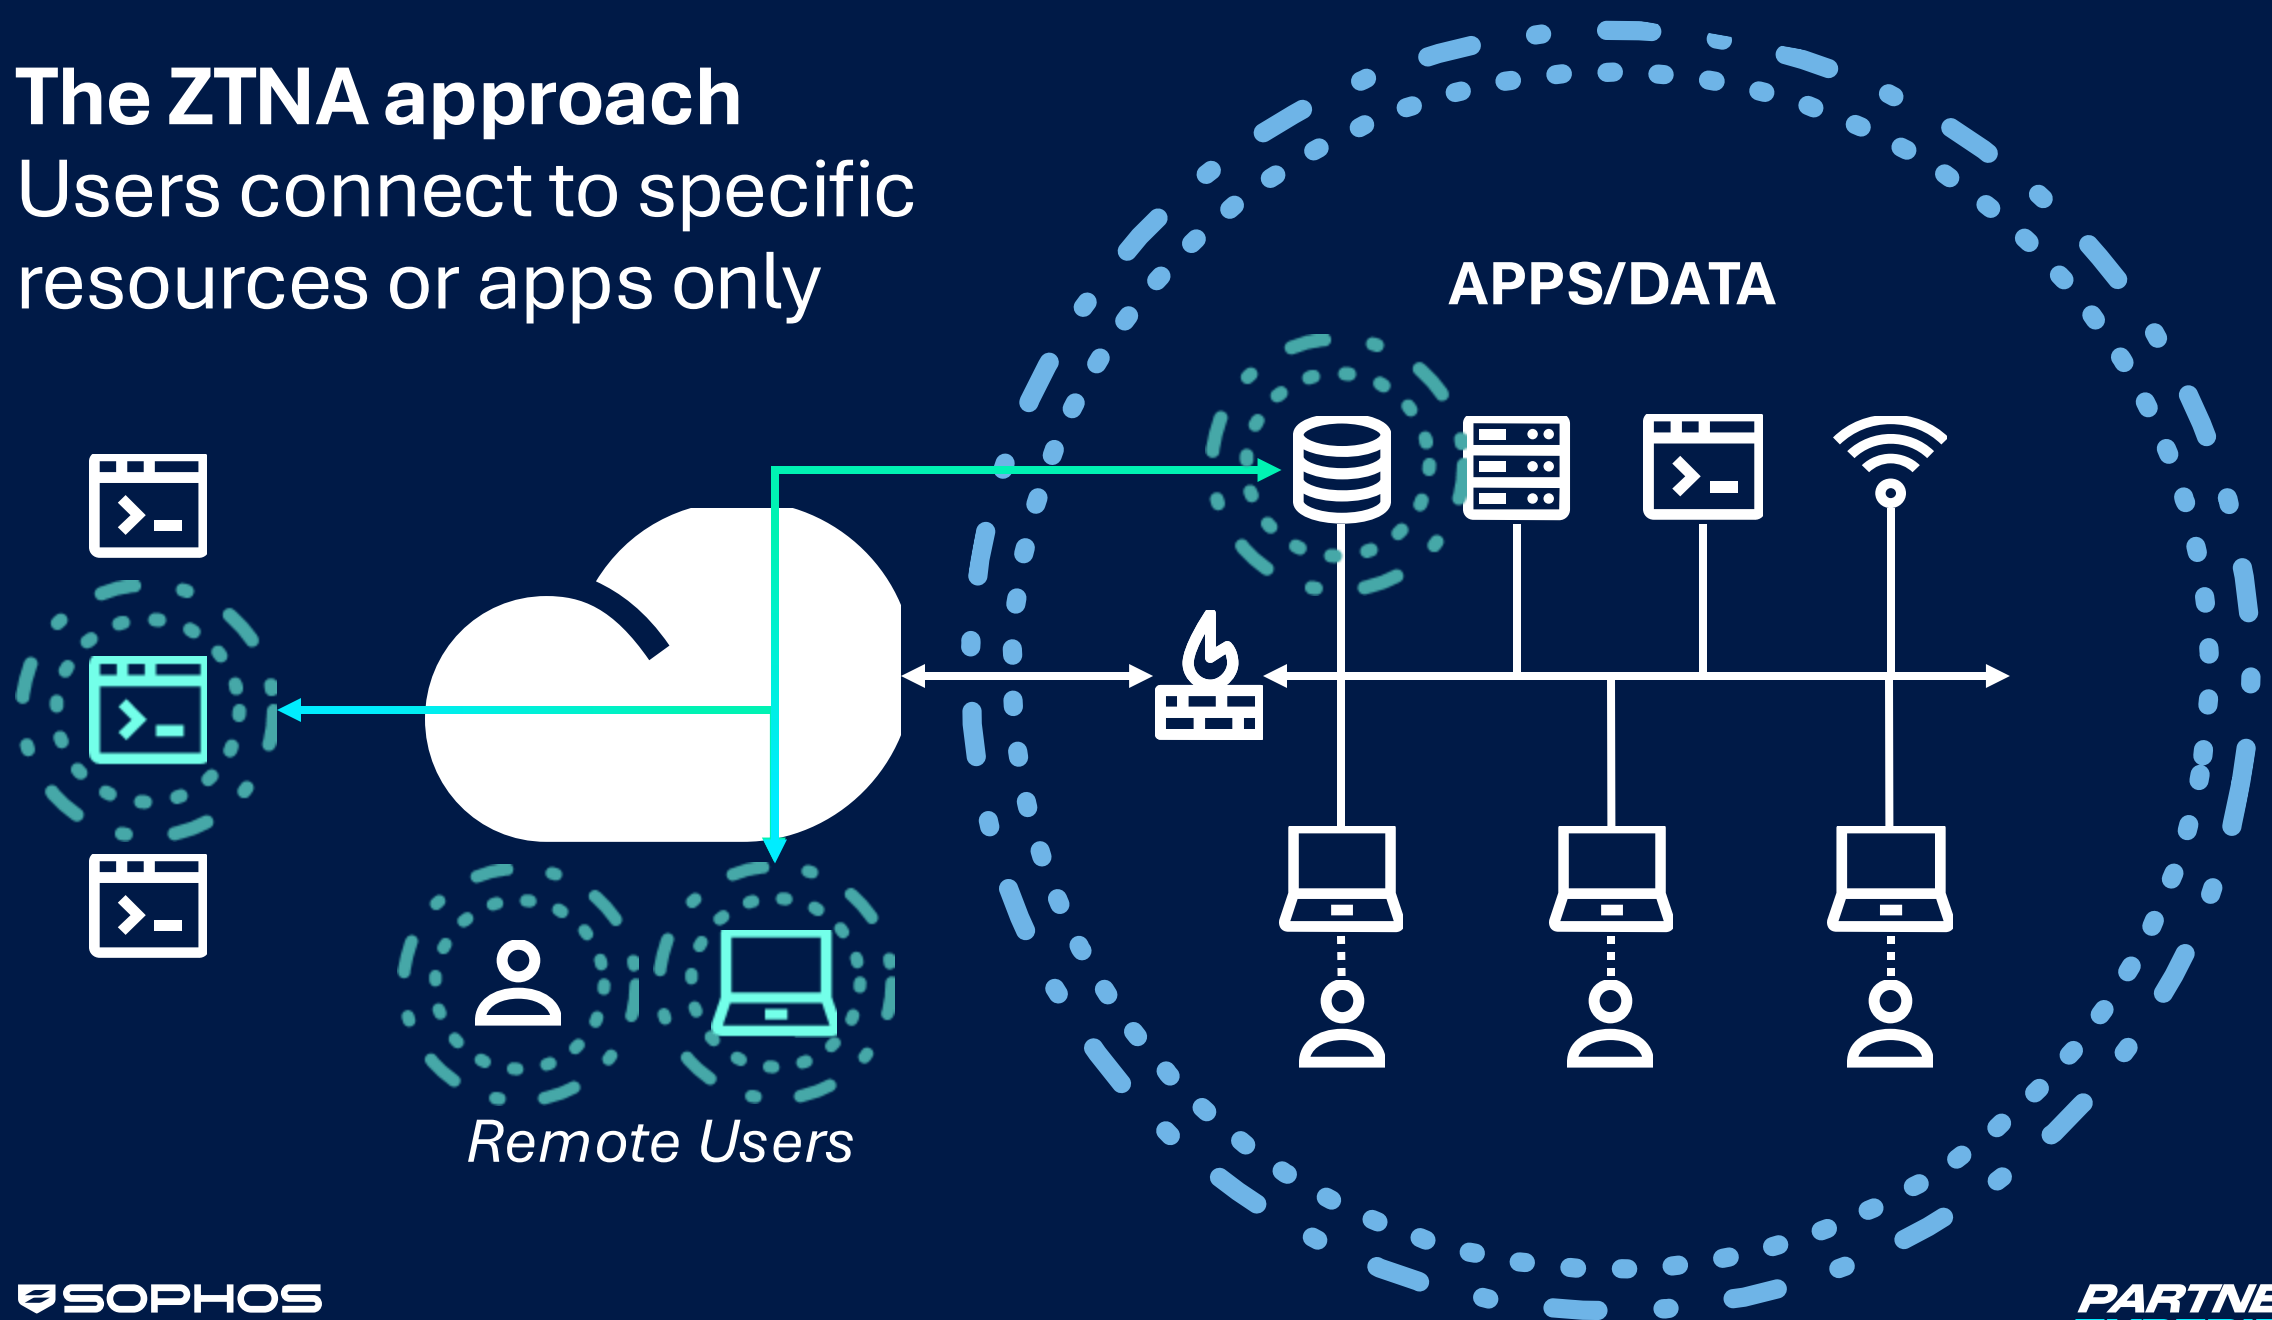

The problem with VPN  
once you're on the  
network, you're trusted

# The ZTNA approach

Users connect to specific resources or apps only

# Sophos Workspace Protection – What You Get:

## ZTNA

- In-browser integration
- RDP and SSH support
- Device posture assessment including Synchronized Security

## SaaS Control

- Application usage monitoring and controls
- Data controls and data boundary

## Secure Web & DNS

- Web and DNS Policy Engine
- Sophos Threat Intel
- DNS Protection
- User/Device Policy

## Hardened Browser

- Improves security against browser exploits/attacks without the heavy RBI experience

## Data Loss Controls

- Cut / Copy & Paste
- Screen Capture
- Print / Save
- Download & Upload
- Data Redaction

## Email Monitoring

- Detection of malicious URLs injected via email
- Detection of phishing messages delivered to end users

## Sophos Central

- Management of Protected Browser
- Integration with Central Directory Services
- Synchronized Security Support

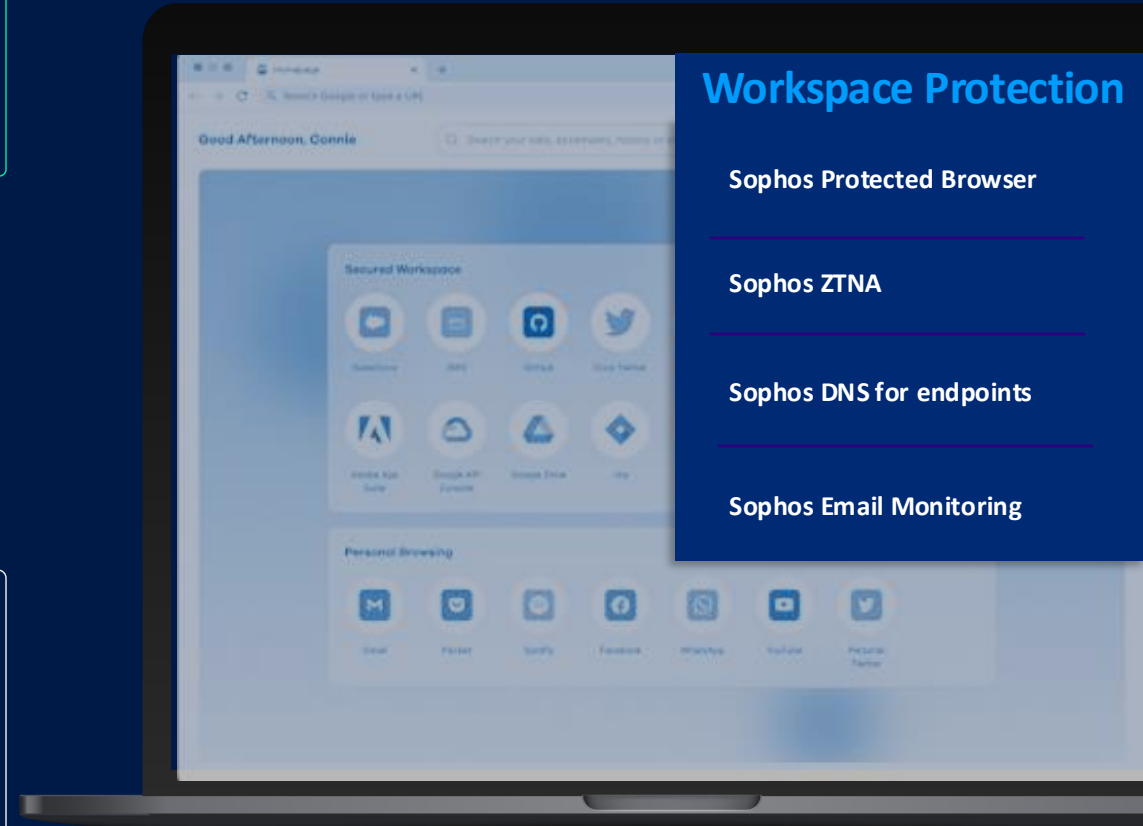

## Sophos Cloud

- Sophos SXL URL/Domains, Intelix file upload/downloads
- Integrated with Sophos Datalake
- ZTNA data plane integration

## Deployment

- Easy installation in 30 seconds by end users
- Managed or unmanaged devices
- Windows, Mac, browser support
- DNS for Windows
