SOPHOS

Sophos Advisory Services

Proactively put your defenses to the test

Sophos Advisory Services help your organization minimize cybersecurity risk through expert-led technical tests and incident readiness services designed to strengthen your defenses and enhance your resilience via a proactive, strategic approach. We use actual attacker techniques, insights from leading threat intelligence, and findings from threat hunting and incident response engagements to test your systems, networks, and people, helping fortify your resiliency against attacks.

Use cases

1 | DISCOVER WEAK SPOTS IN YOUR DEFENSES

Desired outcome: Identify vulnerabilities before attackers can exploit them.

Solution: Sophos Advisory Services put your defenses to the test, using our experience from delivering testing and assessment engagements, and the latest intelligence into current and emerging threats to find the weak spots in your environment before a threat actor strikes.

2 | ASSESS YOUR RISK OF BEING BREACHED

Desired outcome: Evaluate the likelihood your organization could be impacted by a cyber incident.

Solution: Sophos Advisory Services enable you to determine your real-world risk of compromise, leveraging our experience and industry best practices for incident readiness and response.

3 | DEMONSTRATE SOUND SECURITY TO BUSINESS PARTNERS

Desired outcome: Build trust with your customers, partners, and stakeholders.

Solution: Sophos Advisory Services demonstrate your commitment to cybersecurity to your most important stakeholders, including business leaders, partners, customers, and prospects. These services signify your organization's readiness to respond in the event of an active threat, and your proactive efforts to reduce risk of cyberattacks that could impact not just your organization, but those who rely on your business.

4 | FORTIFY CYBER RESILIENCY

Desired outcome: Strengthen your security posture with insights into the threat landscape.

Solution: Sophos Advisory Services make your security program more resilient, with integrated threat intelligence from Sophos X-Ops and insights from incident response engagements infused into our testing methodology.

Available services

- External Penetration Testing
- Internal Penetration Testing
